PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Engineered **Java Spring Boot** microservices to handle real-time data ingestion for an enterprise **payments operations dashboard**, processing approximately 3,000 transaction messages per hour.
- Developed and maintained **JPA** entities and complex relational queries against **PostgreSQL** databases for core financial reporting functions, ensuring data integrity across multiple modules.
- Implemented RESTful APIs using **Spring Boot** for inter-service communication, facilitating seamless data exchange between backend systems and downstream applications.
- Designed and deployed containerized applications on **AWS EC2** using **Docker**, integrating with **Jenkins** for automated CI/CD pipelines and managing deployments across development and production environments.
- Automated data extraction and transformation tasks using **Python** scripts, creating scheduled reports and ETL processes that reduced manual effort by **~15 hours** per week.
- Managed production incidents for enterprise applications, performing root cause analysis using **Splunk** and **Dynatrace**, and adhering to strict SLAs to minimize system downtime.
- Collaborated with cross-functional teams, including business analysts and operations, to gather requirements, support UAT, and triage issues for enterprise systems and financial dashboards.

SKILLS

Backend Development – Java, Spring Boot, REST APIs, Microservices, JPA, Hibernate, JUnit, Maven, Gradle

Data Engineering & Analytics – Python, pandas, NumPy, SQL, PostgreSQL, MySQL, Oracle, ETL, Data Warehousing, Power BI, Tableau, DAX, Power Query

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git, CI/CD

Observability & Monitoring – Splunk, Dynatrace, CloudWatch

Databases – PostgreSQL, MySQL, Oracle

Operating Systems – Linux, Shell Scripting

Methodologies – Agile, Scrum, Change Management

PROJECTS

Enterprise Payments Dashboard Enhancement (HCL Technologies)

- Developed new Java Spring Boot services to integrate additional transaction data sources into a financial operations dashboard, increasing visibility into payment flows by **30%**.
- Wrote complex SQL queries and stored procedures in PostgreSQL to support reconciliation workflows and generate audit trails for critical financial transactions.
- Collaborated with client operations teams to refine alerting mechanisms for failed payment messages, reducing manual investigation time by **~10%** per incident.

Python Automation for ERP Data Integration (HCL Technologies)

- Created Python scripts to automate the extraction, transformation, and loading of data between disparate ERP modules and downstream reporting systems, saving approximately **8 hours** of manual work monthly.
- Implemented data validation checks within the ETL pipelines to ensure accuracy and consistency of financial data before it was loaded into the primary data warehouse.
- Managed scheduled jobs using cron and Jenkins, ensuring reliable execution of data pipelines that supported daily operational reporting.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
