PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Supported development of software projects and platforms within a financial services context, ensuring compliance with established standards and patterns for application and component-level design.
- Followed strict coding standards and quality assurance measures for software development, ensuring all code was thoroughly tested in accordance with team and lead guidelines.
- Undertook offsite and onsite training modules as specified by the apprenticeship program, actively engaging with mentoring to acquire foundational software development skills.
- Collaborated with cross-functional teams to address real-life problems, contributing to coding, development, and testing efforts within agile project frameworks.
- Gained exposure to multiple programming languages and industry practices through structured learning blocks and on-the-job application during the apprenticeship.
- Applied problem-solving skills to complex technical challenges, learning to navigate ambiguous tasks and proactively seek solutions and advice from senior engineers.
- Containerised several Java Spring Boot microservices using **Docker**, deploying them to an **AWS EKS** cluster and managing configurations via **Helm** charts.

SKILLS

Languages – Java, Python, SQL, R, English

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn, Hibernate, JPA, Flask, FastAPI, React, Angular

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git, Helm

Databases – PostgreSQL, MySQL, Oracle

BI & Analytics – Power BI, Tableau, DAX, Power Query, RStudio

Methodologies – Agile, Scrum

Tools – Jira, Confluence, Splunk, Dynatrace, Linux

PROJECTS

Enterprise Java Payments Operations Dashboard

- Developed and maintained a **Java Spring Boot**-based payments operations dashboard for a financial services client, focusing on transaction monitoring and operational alerting.
- Implemented robust error handling and logging using **Splunk** and **Dynatrace** to track and resolve P1/P2 incidents, ensuring adherence to strict SLAs.
- Integrated with upstream and downstream systems via **REST APIs**, processing and validating transaction data flows across PostgreSQL and Oracle databases.

Python ETL Pipeline for Financial Data Aggregation

- Engineered an automated **Python** ETL pipeline to aggregate financial transaction data from multiple sources, performing data cleansing and transformation using **pandas** and **NumPy**.
- Scheduled and monitored data ingestion jobs using **Jenkins**, ensuring reliable delivery of aggregated datasets for downstream analytical reporting.
- Wrote complex **SQL** queries for data validation and quality checks against a **PostgreSQL** data warehouse, supporting reconciliation workflows.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
