+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • Stamp 1G — Full-Time Work Eligible

PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and built **Java Spring Boot** microservices for core platform functionality, including **REST API** development and integration with downstream systems.
- Developed and maintained **Java** applications using **Hibernate** for data persistence, ensuring efficient and secure data access across multiple modules.
- Implemented asynchronous processing using **Java Message Service (JMS)** and message queues to handle high-volume transaction data, improving system responsiveness by **22%**.
- Modeled complex data structures for financial signals, transforming raw external data into a coherent product surface for customer use.
- Built event-driven pipelines to ingest, transform, and enrich data from various external sources, ensuring data integrity and availability for downstream services.
- Operated production systems in **AWS** with a security-first approach, adhering to data protection and compliance requirements for regulated financial data.
- Containerised backend Java services using **Docker** and deployed them to **AWS EC2** instances, managing configurations and ensuring consistent environments across development and production.

SKILLS

Languages – Java, Python, SQL, R

Frameworks/Libraries – Spring Boot, Hibernate, Hibernate Validator, JUnit, Mockito, pandas, NumPy, scikit-learn, FastAPI

Cloud/Infra – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux

Databases – PostgreSQL, MySQL, Oracle

Tools/Concepts – REST APIs, Event-Driven Architecture, Microservices, CI/CD, Agile, Data Modelling, Observability, Security Best Practices

Domain – Fintech, Payments, Credit, KYB, Financial Services, Data Analytics

PROJECTS

Java Backend for B2B Credit Risk Platform

- Developed core **Java Spring Boot** services responsible for user authentication, credit data ingestion, and risk scoring calculations.
- Designed and implemented the **JPA** data model to represent complex relationships between business entities, payment terms, and credit signals.
- Integrated with external data providers via **REST APIs** to enrich business profiles, contributing to a more comprehensive view of customer risk.

Event-Driven Data Enrichment Pipeline

- Engineered a **Python**-based pipeline to process and enrich inbound business data streams using **pandas** for transformation logic.
- Implemented asynchronous processing with **AWS Lambda** and **SQS** to handle fluctuating data volumes, reducing processing latency by **30%**.
- Built data validation checks and error handling mechanisms to ensure the quality and reliability of enriched data for downstream analytics.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
