PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot microservices**, designing and implementing RESTful APIs for cross-service data exchange and integrating with persistence layers.
- Engineered robust **Hibernate/JPA** data access objects and entities, optimizing database interactions for complex financial transaction processing and ensuring data integrity across relational databases.
- Authored comprehensive unit and integration tests using **JUnit and Mockito**, achieving over 85% code coverage for critical application modules and validating adherence to object-oriented design principles.
- Collaborated with product owners and architects to define and groom backlogs, translating business requirements into actionable technical tasks for an agile development team.
- Mentored 3 junior engineers on **software delivery best practices**, including code review standards, TDD principles, and effective debugging techniques, improving team code quality.
- Championed and implemented new testing tools and techniques, such as **Karate for API testing**, reducing manual testing effort by approximately 30% for new feature releases.
- Containerised multiple Java applications using **Docker** and deployed them to an **AWS EC2** environment, configuring basic resource limits and connectivity for improved deployment consistency.

SKILLS

Core Java – Java, Spring Boot, Hibernate, JPA, JUnit, Mockito, Maven

Backend Development – REST APIs, Microservices, Design Patterns, TDD, Pair Programming, Code Reviews

Scripting & Automation – Python, bash, Jenkins, Git, GitHub, SonarQube

Cloud & Containerization – AWS (EC2, S3, Lambda, CloudWatch), Docker

Databases – PostgreSQL, MySQL, Oracle

Agile Methodologies – Scrum, Backlog Grooming, Sprint Planning, UAT

PROJECTS

Enterprise Java Application Modernization (HCL Technologies)

- Refactored a monolithic Java application into a set of **Spring Boot microservices**, improving modularity and enabling independent deployments.
- Implemented robust data persistence using **JPA and Hibernate**, managing complex relationships and optimizing query performance for core business logic.
- Developed internal RESTful APIs for inter-service communication, ensuring consistent data contracts and error handling across the microservice architecture.

Automated API Testing Framework (HCL Technologies)

- Designed and built an automated API testing framework using **Karate** and **Java** to validate the functionality of critical backend services.
- Integrated the testing framework into the **Jenkins CI/CD pipeline**, enabling automated regression testing on every code commit and reducing manual testing cycles by over 40%.
- Authored over 150 test cases covering core API endpoints, ensuring functional correctness and adherence to performance standards for a high-transaction volume system.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
