PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Python**-based ETL pipelines to ingest and transform data from multiple enterprise sources, reducing manual processing time by approximately **40%**.
- Engineered **Java Spring Boot** microservices for core business functionalities, designing and implementing RESTful APIs that handled over **5,000 requests per minute**.
- Implemented robust **SQL** queries and stored procedures for data validation and manipulation across **PostgreSQL** and **Oracle** databases, supporting critical financial operations.
- Wrote and maintained **Python** scripts for automating system monitoring tasks and generating scheduled operational reports, enhancing team efficiency.
- Designed and deployed containerized **Java** applications using **Docker** on **AWS EC2** instances, integrating with **Jenkins** for CI/CD pipelines.
- Collaborated with cross-functional teams to gather requirements and implement features for enterprise business systems, ensuring smooth system integrations via **REST APIs**.
- Managed production incidents for enterprise applications, performing root cause analysis and implementing fixes within strict **SLA** targets, utilizing **Splunk** and **Dynatrace** for observability.

SKILLS

Programming Languages – Python, Java, SQL, R, TypeScript

Web Frameworks – Spring Boot, Flask, FastAPI, NestJS, Angular, React

Databases – PostgreSQL, MySQL, Oracle, MongoDB, Redis, TigerGraph, Starburst/Trino

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, OpenShift, Jenkins, Git, Hitachi S3

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, pandas, NumPy, scikit-learn, RStudio

Messaging & Streaming – Apache Kafka

Tools & Methodologies – JIRA, Confluence, Agile, Scrum, SQLAlchemy, Data Lineage

PROJECTS

Enterprise Data Pipeline Orchestration (HCL Technologies)

- Developed a scalable **Python** data pipeline using **Flask** to process and aggregate transaction data from disparate sources for an internal financial reporting system.
- Integrated the pipeline with **PostgreSQL** for data storage and retrieval, implementing efficient **SQL** queries for data transformation and validation, handling approximately **15,000 records daily**.
- Containerized the application using **Docker** and deployed it onto **AWS EC2**, establishing a repeatable deployment process through a **Jenkins** CI/CD pipeline.

Microservice for Transaction Monitoring (HCL Technologies)

- Built a **Java Spring Boot** microservice to monitor real-time transaction flows and trigger alerts for anomalies, contributing to a payments operations dashboard.
- Implemented RESTful endpoints for data ingestion and status updates, ensuring low latency and high availability for critical operational data.
- Wrote comprehensive unit tests using **JUnit** and integrated the service into the existing enterprise application landscape, supporting a team of **4 engineers**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
