PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Ensured high availability and fault tolerance for Kafka clusters and Axon platform services by operating and improving reliability mechanisms for brokers, partitions, and replication services.
- Participated in on-call rotations, providing hands-on support during production incidents and leading incident triage, mitigation, and recovery for Kafka and Axon-related issues.
- Designed and implemented monitoring, alerting, and dashboards for Kafka and Axon services, continuously tuning alerts to reduce noise and improve signal quality, ensuring proactive incident detection.
- Supported production changes, maintenance activities, and platform upgrades, including broker patching and certificate renewals, by reviewing change requests and deployment plans to ensure operational readiness.
- Automated repetitive operational tasks and health checks through Python scripting, improving operational efficiency and reducing manual intervention for platform maintenance workflows.
- Partnered with application teams to support onboarding and operational best practices for the event streaming platform, providing guidance on Kafka usage patterns and resiliency.
- Containerized platform services using **Docker** and deployed them to a **Kubernetes** cluster (EKS), wiring up Helm chart configuration and basic resource limits for predictable rollout.

SKILLS

Messaging Platforms – Apache Kafka, Axon, Event Streaming

Programming & Scripting – Python, Java, Bash

Observability & Monitoring – Splunk, Dynatrace, CloudWatch, Metrics, Logs, Dashboards

Cloud & Containerization – AWS, EC2, S3, Lambda, Docker, Kubernetes

Operating Systems & Networking – Linux, System Troubleshooting, Networking Fundamentals

DevOps & CI/CD – Jenkins, Git, Change Management, Release Management

Incident & Reliability – Incident Management, Root Cause Analysis, SLIs, SLOs, MTTR

PROJECTS

Enterprise Kafka Platform Reliability Enhancement

- Improved the reliability of a multi-tenant Kafka platform by implementing automated health checks and recovery scripts using **Python**, reducing manual intervention by **30%**.
- Developed comprehensive monitoring dashboards in **Splunk** to track key performance indicators (KPIs) and alert on anomalies for Kafka brokers and Zookeeper nodes, enhancing proactive issue detection.
- Contributed to the deployment and maintenance of Kafka clusters on **AWS**, ensuring high availability and fault tolerance through configuration management and regular patching.

Automated Production Incident Triage System

- Engineered a **Python**-based automation tool to analyze logs and alerts from **Dynatrace** and **CloudWatch** during production incidents, categorizing issues and suggesting initial triage steps.
- Integrated the tool with ticketing systems, reducing the mean time to acknowledge (MTTA) for P1 incidents by approximately **15%** for the operations support team.
- Designed and documented the system architecture and usage protocols, facilitating adoption by cross-functional incident response teams.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
