PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and deployed a **Java Spring Boot** microservice to handle **customer registration** and authentication flows, processing approximately **400 requests per minute**.
- Implemented **JPA entities and Hibernate mappings** for a core user profile service, managing relational data persistence across a **PostgreSQL** database.
- Constructed a **Java REST API** for a client-facing dashboard, enabling data retrieval for **transaction monitoring** and operational alerting functionalities.
- Collaborated with cross-functional teams during **Agile ceremonies**, contributing to sprint planning and technical estimation for new feature development.
- Participated in **code reviews** for a team of 5 engineers, identifying potential defects and ensuring adherence to coding standards.
- Containerized the Spring Boot application using **Docker** and configured basic resource limits for deployment onto an **AWS EC2** instance.
- Designed and implemented **automated Python scripts** to parse and aggregate operational logs from **Splunk**, reducing manual reporting time by **~6 hours per week**.

SKILLS

Backend Development – Java, Spring Boot, REST APIs, Hibernate, JPA, Microservices, JUnit, Maven

Data & Analytics – Python, pandas, NumPy, SQL, PostgreSQL, MySQL, Oracle, ETL, Data Warehousing, Power BI, Tableau, DAX, Power Query

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, CI/CD

Operations & Monitoring – Splunk, Dynatrace, CloudWatch, Linux, Shell Scripting, Cron Jobs, Incident Response, SLA Management

Enterprise Systems – Jira, Confluence, Agile, Scrum, Change Management, ERP Integration Support

Data Science & ML – scikit-learn, R/RStudio, Statistical Analysis, Regression, Hypothesis Testing, Machine Learning Fundamentals

PROJECTS

Enterprise Java Service for Transaction Processing

- Developed a **Java Spring Boot** application to process and validate incoming financial transaction messages for an enterprise client, handling up to **1,500 messages per hour**.
- Integrated **Hibernate and JPA** with a **PostgreSQL** backend to manage persistent storage of transaction data and associated metadata, ensuring data integrity.
- Built a **RESTful API** to expose processed transaction data for an internal operational dashboard, facilitating real-time monitoring and reconciliation workflows.

Customer Onboarding Data Pipeline Automation

- Engineered a **Python ETL pipeline** to automate the ingestion and transformation of customer data from disparate sources into a centralized data warehouse, reducing manual effort by **40%**.
- Applied **pandas and NumPy** for data cleaning, validation, and enrichment steps within the pipeline, ensuring high data quality for downstream analytics.
- Wrote comprehensive unit tests using **pytest** to ensure the reliability and correctness of data transformations, covering over **90% of the codebase**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
