PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained the primary frontend application for a quantum computing software development tool using **React**, **TypeScript**, and **Next.js**, integrating with backend services via **RESTful APIs**.
- Implemented responsive and accessible UI components with **Chakra UI**, ensuring consistent user experience across diverse devices and screen sizes for a growing user base.
- Collaborated with a distributed team of software engineers, scientists, and product managers to define and implement features, contributing to the overall software architecture and roadmap.
- Engineered interactive data visualizations and state management solutions using **Zustand**, enabling complex data exploration for users interacting with quantum computing simulations.
- Contributed to code reviews, mentored junior engineers on frontend best practices, and participated actively in **Agile** ceremonies, enhancing team productivity and code quality.
- Integrated **Apollo Client** for efficient data fetching and caching from GraphQL endpoints, improving application performance and reducing network requests.
- Containerized frontend applications using **Docker** for consistent development and deployment environments, facilitating seamless integration with cloud services.

SKILLS

Frontend Languages – JavaScript, HTML, TypeScript

Frontend Frameworks/Libraries – React, Next.js, Chakra UI, Apollo Client, Zustand

API Technologies – RESTful APIs, GraphQL

Development Tools – Git, Docker, Jenkins

Methodologies – Agile, Scrum

Cloud Services – AWS (EC2, S3, Lambda, CloudWatch)

PROJECTS

Quantum Circuit Visualizer (HCL Technologies)

- Developed a dynamic frontend interface using **React** and **TypeScript** to visualize quantum circuits and simulate their execution.
- Integrated with a backend simulation engine via **RESTful APIs**, rendering complex quantum gate operations in real-time for up to 15 qubits.
- Designed and implemented a component library using **Chakra UI** to provide a consistent and accessible user experience for scientific users.

Developer Tooling Dashboard (HCL Technologies)

- Built an interactive dashboard in **Next.js** to monitor the health and performance of developer tools and services.
- Managed application state efficiently using **Zustand**, enabling seamless navigation between different monitoring views.
- Implemented data fetching logic with **Apollo Client** to retrieve metrics from various microservices, supporting analysis for an engineering team of 8.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
