PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Deployed and managed **Kubernetes clusters** on **AWS EKS**, implementing granular **RBAC policies** and network segmentation to enforce security posture.
- Automated the provisioning of new Kubernetes environments using **Terraform**, enabling self-service cluster creation for development and staging teams.
- Integrated **ArgoCD** for GitOps-based application deployments, reducing manual deployment steps and ensuring consistent application states across environments.
- Implemented comprehensive cluster observability using **Prometheus** and **Grafana**, establishing dashboards for monitoring pod health, resource utilization, and cluster performance metrics.
- Troubleshoot and resolved complex cluster degradation events, including failed pods and memory leaks, by analyzing logs from **Fluentd** and system metrics.
- Managed containerized workloads across hybrid cloud environments, utilizing **Docker** for packaging and deployment on both on-premises infrastructure and **AWS EC2** instances.
- Collaborated with application development teams to define and implement containerization strategies, advising on best practices for cloud-native application architectures.

SKILLS

Container Orchestration – Kubernetes, EKS, AKS, GKE, Rancher, kubectl, Helm, ArgoCD

Infrastructure as Code – Terraform

Cloud Platforms – AWS

Observability – Prometheus, Grafana, Loki, Fluentd, Fluent Bit

CI/CD – Jenkins, GitOps

Containerization – Docker

Operating Systems – Linux

PROJECTS

Automated Kubernetes Cluster Deployment Pipeline

- Engineered an automated pipeline for provisioning **Kubernetes clusters** on **AWS EKS** using **Terraform**, reducing cluster setup time by approximately 60%.
- Integrated **Helm** charts for standardized application deployments, ensuring consistent configuration management across multiple development and staging environments.
- Developed CI/CD integration points within the pipeline to facilitate seamless application updates and rollbacks through **GitOps** principles.

Kubernetes Observability and Monitoring Solution

- Implemented a centralized logging solution using **Fluentd** to aggregate container logs from distributed **Kubernetes pods** into a central repository.
- Configured **Prometheus** and **Grafana** to provide real-time monitoring and alerting for cluster health and application performance, establishing key service level indicators (SLIs).
- Developed custom dashboards in Grafana to visualize pod status, resource consumption, and network traffic, aiding in rapid troubleshooting of performance bottlenecks.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
