PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Managed the **P1/P2 incident response** for critical enterprise applications, ensuring adherence to strict SLAs and coordinating with operations teams for timely resolution.
- Developed **Python scripts** for automating data ingestion and ETL processes, reducing manual effort by an estimated **30%** and improving data pipeline efficiency.
- Designed and implemented **Java Spring Boot REST APIs** to facilitate cross-service communication, supporting new feature development within existing microservices architecture.
- Supported and maintained **Linux environments**, performing log analysis, shell scripting for routine tasks, and managing cron jobs for scheduled operations.
- Collaborated with product and engineering teams to integrate operational insights into the development lifecycle, contributing to the design of more reliable systems.
- Documented support processes, operational standards, and best practices to enhance the team's knowledge base and streamline future troubleshooting efforts.
- Monitored system alerts across vendor and internally hosted infrastructure using tools like **Splunk** and **CloudWatch**, responding rapidly to service failures and escalations.

SKILLS

Languages – Java, Python, SQL, Shell Scripting

Frameworks/Libraries – Spring Boot, Hibernate, JPA, pandas, NumPy, scikit-learn

Cloud/Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux

Databases – PostgreSQL, MySQL, Oracle

Tools/Platforms – Jenkins, Jira, Confluence, Splunk, Dynatrace, Git, Slack

PROJECTS

Java Application Support & Automation

- Provided critical production support for enterprise Java applications, diagnosing and resolving P1/P2 incidents within defined SLAs using **Splunk** and **Dynatrace** for monitoring.
- Automated routine system checks and data validation tasks using **Python scripting**, reducing manual intervention time by approximately **25%** for the support team.
- Contributed to the enhancement of **Java Spring Boot** services by implementing bug fixes and small feature additions, ensuring stability and performance of core financial operations systems.

Production Monitoring and Alerting System

- Developed and maintained **Python-based data pipelines** to ingest and process transaction data for an operational dashboard, ensuring data integrity for monitoring workflows.
- Configured and managed monitoring alerts within **AWS CloudWatch** and **Splunk** for a financial services dashboard, enabling proactive identification of ~50-70 transaction processing anomalies daily.
- Created detailed documentation and runbooks for incident response procedures, improving the onboarding time for new support engineers by about **40%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
