PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Executed rate changes and validated rating logic for Private Car, Home, and Light Commercial Motor portfolios, ensuring accurate premium calculations for an insurance client.
- Monitored portfolio performance using advanced Excel and structured datasets, identifying key trends and anomalies to inform pricing strategies.
- Collaborated with the data team to ingest and validate high-quality input data, maintaining comprehensive audit trails for pricing governance and regulatory compliance.
- Developed Python scripts to automate data extraction and transformation processes, supporting the preparation of datasets for analytical review and reporting.
- Analyzed transaction data using SQL queries against PostgreSQL, extracting insights on payment flows and reconciliation workflows for operational reporting.
- Designed and implemented REST APIs using Java Spring Boot for secure data exchange between internal systems, supporting enterprise business integrations.
- Containerized Java Spring Boot applications using Docker and deployed them to AWS EC2 instances, managing core infrastructure for production services.

SKILLS

Core Responsibilities – Pricing Execution, Rating Logic Validation, Performance Monitoring, Audit Trail Maintenance, Data Ingestion, Cross-functional Collaboration

Analytical Tools – Advanced Excel, SQL, Python, R

Data Handling – Structured Datasets, Data Validation, ETL, Data Extraction, Data Transformation

Programming Languages – Java, Spring Boot, Python, SQL

Cloud & Containerization – AWS, EC2, Docker

Methodologies – Agile, Scrum, Change Management

PROJECTS

Insurance Portfolio Analysis and Reporting Tool

- Developed a Python-based tool to ingest and process structured insurance portfolio data, enabling detailed analysis of trends and anomalies.
- Integrated Advanced Excel functionalities for interactive dashboard creation, allowing stakeholders to visualize pricing performance and key metrics.
- Implemented SQL queries for data validation and audit trail generation, ensuring data integrity and compliance with pricing governance standards.

Automated Rate Change Implementation System

- Engineered a system using Python and SQL to automate the execution of rate changes across different insurance product portfolios.
- Built validation checks within the system to rigorously test rating logic outputs before live market deployment, reducing manual errors by an estimated 30%.
- Designed a modular architecture for easy integration with existing data sources and reporting tools, facilitating seamless updates to pricing models.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
