PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented scalable data pipelines using **Python** and **FastAPI**, integrating data from diverse sources including APIs and PostgreSQL databases, to support analytical workloads.
- Developed and optimized **ETL/ELT workflows** for performance and maintainability, processing large volumes of structured and unstructured data for downstream analytics and machine learning applications.
- Built and refined **database schemas** and **data models** in PostgreSQL, ensuring data integrity and facilitating efficient query performance for complex analytical requirements.
- Collaborated with data scientists and ML engineers in a distributed international team to define data requirements, ensure data quality, and facilitate seamless data integration into data lakes and warehouses.
- Implemented data governance and security standards across data pipelines, adhering to best practices for data quality, consistency, and compliance in enterprise analytics environments.
- Wrote **Python scripts** to automate data ingestion and transformation tasks, reducing manual effort and improving the reliability of scheduled reporting processes by an estimated **30%**.
- Containerized data pipeline components using **Docker** and deployed them to a cloud environment, ensuring consistent execution across development and production.

SKILLS

Backend Development – Python, FastAPI, Django REST Framework, Flask, REST APIs

Data Engineering – ETL/ELT, Data Warehousing, Data Lakes, Data Modeling, SQL, Database Schema Design, Query Optimization

Cloud & DevOps – AWS, Docker, CI/CD, Git, Kubernetes

Data Processing & Analytics – Pandas, NumPy, Data Quality, Data Governance, Apache Spark (Concepts)

Databases – PostgreSQL, MySQL, Oracle

PROJECTS

Scalable Data Pipeline for Enterprise Analytics

- Engineered a **Python**-based data pipeline on **AWS Lambda** to ingest and process over **5,000** events per hour from multiple API sources and relational databases.
- Integrated structured and unstructured data into a centralized **data lake** using **S3**, enabling easier access for data scientists and analysts.
- Developed robust error handling and monitoring mechanisms within the pipeline, improving data delivery reliability by approximately **20%** and reducing data latency.

Real-time Data Integration Service

- Built a **FastAPI** microservice in **Python** to expose processed data via a REST API, serving real-time analytics dashboards to business stakeholders.
- Implemented efficient data querying and aggregation strategies against a **PostgreSQL** database, reducing average API response times to under **200ms**.
- Containerized the service using **Docker**, facilitating straightforward deployment and scaling within a cloud-agnostic environment.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
