PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented data ingestion pipelines using **Python** and **PySpark** to consolidate data from **ServiceNow** and other enterprise sources into a **Databricks Lakehouse** architecture.
- Developed and maintained data transformation processes within **Databricks Delta Live Tables (DLT)**, ensuring data quality and integrity for downstream analytical consumption.
- Collaborated with cross-functional teams, including Full Stack Engineering and Reliability Engineering, to define and deliver new data features, participating in **code reviews** and **sprint planning**.
- Integrated data from various systems, including REST APIs and JDBC databases, to populate the global **Data Warehouse**, adhering to established **data modeling** and **ETL** best practices.
- Developed automation scripts in **Python** to enhance the efficiency of data validation and testing procedures, aligning with **Intelligent Automation** principles for development and release cycles.
- Monitored system performance and data pipeline execution using **AWS CloudWatch** and **Grafana**, troubleshooting and resolving issues to maintain expected **SLAs**.
- Containerized data processing applications using **Docker** and deployed them to an **AWS EKS** cluster, managing configurations with **Databricks Asset Bundles**.

SKILLS

Data Engineering – Databricks, Lakehouse Architecture, Delta Lake, Delta Live Tables (DLT), Unity Catalog, Databricks Asset Bundles, Cluster Management, ETL, Data Warehousing, Data Modeling, Data Quality, Data Ingestion

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch), Azure

Programming Languages – Python, PySpark, Java, Scala

Data Processing Frameworks – Apache Airflow, Trino, dbt

Databases & Storage – PostgreSQL, MySQL, Oracle, Apache Iceberg, Delta-Parquet

Tools & Technologies – Docker, Kubernetes, Jenkins CI/CD, REST APIs, JDBC, SFTP, Linux, Git, Jira, Confluence, Grafana

Analytics & Visualization – Power BI, Tableau, DAX, Power Query, XBI, VC Reports

PROJECTS

Global Data Warehouse Consolidation (HCL Technologies)

- Developed data ingestion pipelines using **Python** to extract and transform data from disparate enterprise systems, populating a central **PostgreSQL** data warehouse.
- Implemented scheduled data loading jobs via **Cron** and **Jenkins**, ensuring timely availability of data for operational reporting and cross-system integration.
- Authored **SQL** scripts for data validation and schema management, supporting change control processes for system configuration updates.

Financial Operations Dashboard Enhancement (HCL Technologies)

- Engineered **Python** scripts to automate the generation of daily operational reports from a financial services transaction monitoring system, reducing manual effort by **~40%**.
- Designed and implemented data validation checks using **SQL** across **Oracle** and **PostgreSQL** databases to ensure accuracy of transaction flow data.
- Supported the production environment of a payments operations dashboard, responding to P1/P2 incidents and performing root cause analysis for transaction processing issues.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
