PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** microservices, implementing **REST APIs** for inter-service communication and handling approximately **1,500 requests per minute**.
- Implemented data persistence layers using **Hibernate** and **JPA**, managing complex object-relational mappings and optimizing database interactions for enterprise applications.
- Authored comprehensive **JUnit** and **Mockito** test suites for **Java** backend services, achieving over **85% code coverage** and ensuring code quality through rigorous unit testing.
- Collaborated in an **Agile** environment, participating in sprint planning, daily stand-ups, and code reviews to deliver features incrementally and manage technical debt.
- Designed and implemented robust **Java** backend solutions that supported complex financial transaction processing, including error handling and retry mechanisms for failed operations.
- Contributed to the development of a **payments operations dashboard** by building backend services that processed and monitored transaction flows, enhancing operational visibility for a financial services client.
- Containerized backend services using **Docker** and deployed them to **AWS EC2** instances, configuring basic resource limits and networking for predictable performance.

SKILLS

Backend Development – Java, Spring Boot, REST APIs, Microservices, Hibernate, JPA, JUnit, Mockito, Maven

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux

Databases – PostgreSQL, MySQL, Oracle, SQL

Data Analytics & BI – Power BI, Tableau, R, pandas, NumPy, scikit-learn, DAX, Power Query

Enterprise Systems – ERP Integration Support, Change Management, Splunk, Dynatrace

Methodologies – Agile, Scrum

PROJECTS

Java-based Transaction Processing System

- Engineered a **Java Spring Boot** application to process financial transaction messages, implementing fault-tolerant ingestion and validation logic.
- Integrated with a **PostgreSQL** database using **Hibernate** to store transaction details and maintain audit trails for compliance reporting.
- Developed a **REST API** for querying transaction status, enabling operational teams to monitor processing workflows in near real-time.

Financial Operations Dashboard Backend Services

- Built **Java** microservices responsible for collecting and aggregating data related to payment message processing, supporting an enterprise financial services client.
- Implemented data transformation logic using **Python** scripting to prepare operational metrics for display on a **payments operations dashboard**.
- Managed scheduled reporting jobs and automated data validation checks, ensuring data accuracy for reconciliation workflows and operational alerting.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
