PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and developed **Java Spring Boot** REST APIs to support new feature integrations, processing approximately **500 requests per minute**.
- Implemented **Hibernate**-based data access layers for enterprise applications, ensuring efficient and secure interaction with relational databases.
- Wrote comprehensive **JUnit** and **Mockito** test suites for Java backend services, achieving over **90% code coverage** for critical modules.
- Contributed to **architecture and design artifacts** for new application features, ensuring adherence to technical specifications and scalability constraints.
- Executed software solutions, **technical troubleshooting**, and debugging for complex backend systems in a large corporate environment.
- Participated in **Agile ceremonies**, including sprint planning and daily stand-ups, to drive project timelines and deliver features iteratively.
- Deployed containerized Java applications to **AWS EC2** instances using **Docker**, managing build and deployment pipelines via **Jenkins**.

SKILLS

Backend Development – Java, Spring Boot, Hibernate, JPA, REST APIs, Microservices, JUnit, Mockito, Maven, Gradle

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Databases – SQL, PostgreSQL, MySQL, Oracle

DevOps & CI/CD – Docker, Jenkins, Git

Scripting & Automation – Python

Observability & Monitoring – Splunk, Dynatrace

Methodologies – Agile, Scrum

PROJECTS

Enterprise Java Application Modernization

- Refactored legacy Java components into modern **Spring Boot microservices**, improving system modularity and maintainability.
- Implemented robust **JPA** and **Hibernate** configurations for data persistence, handling complex entity relationships across multiple schemas.
- Developed RESTful APIs with detailed Swagger documentation for internal service consumption, supporting over **1,500 daily API calls**.

Automated Transaction Reconciliation System

- Developed a **Python**-based ETL pipeline to extract, transform, and load transaction data from disparate sources into a central data warehouse.
- Engineered automated reconciliation workflows using **pandas** to identify and flag discrepancies, reducing manual effort by an estimated **40%**.
- Implemented scheduled reporting and alerting mechanisms using **SQL** queries and basic shell scripting to notify operations teams of reconciliation issues.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
