PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and prepared **technical drawings**, GA layouts, and fabrication details for automated warehouse systems using **AutoCAD**, supporting the integration of conveyor systems and racking.
- Supported the design of automated warehouse systems and material handling solutions, contributing to engineering calculations and **design validations** for new customer implementations.
- Participated in customer site surveys and technical assessments, gathering requirements for automated warehouse solutions and feeding information back into the design process.
- Assisted with project delivery from concept through installation and commissioning, liaising with **suppliers** and subcontractors on technical queries and component specifications.
- Ensured designs complied with Irish and EU safety standards, including **machinery directives** and CE requirements, by participating in design reviews and risk assessments.
- Managed engineering records and document control procedures, maintaining accurate documentation for automated warehouse system designs and modifications.
- Containerised Python-based automation scripts with **Docker** for deployment on AWS EC2 instances, streamlining data processing workflows.

SKILLS

CAD Software – AutoCAD, SolidWorks

Engineering Design – Technical Drawings, Fabrication Drawings, Assembly Details, Engineering Calculations, Load Assessments, Design Validation, Bill of Materials (BOM)

Warehouse Automation – Automated Warehouse Systems, Material Handling Solutions, Conveyor Systems, Racking Interfaces, Industrial Automation

Project Support – Project Delivery, Installation Support, Commissioning, Site Surveys, Technical Assessments, Procurement Support, Supplier Liaison

Compliance & Quality – Irish & EU Safety Standards, Machinery Directives, CE Marking, Risk Assessment, Document Control

Programming & Scripting – Python, Java, SQL

Cloud & Containerization – AWS (EC2, S3, Lambda, CloudWatch), Docker

PROJECTS

Automated Warehouse Layout Design (HCL Technologies)

- Developed detailed **AutoCAD drawings** for automated warehouse layouts, including conveyor system routing and racking interface specifications for a logistics client.
- Performed initial **engineering calculations** and load assessments for proposed mezzanine structures and material handling equipment to ensure structural integrity.
- Contributed to the preparation of technical documentation packages for customer review, outlining design choices and compliance considerations for the automated system.

Python Automation for System Monitoring (HCL Technologies)

- Engineered **Python scripts** to automate log analysis and data extraction from Splunk and CloudWatch for production support teams, reducing manual effort by approximately 40%.
- Developed data processing pipelines using **pandas** to aggregate monitoring data, identify recurring issues, and generate scheduled reports on system performance.
- Containerised key automation scripts using **Docker**, enabling consistent deployment and execution across different Linux environments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
