PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Architected and developed scalable **Angular** Single Page Applications (SPAs), implementing component-driven UIs with a focus on reactive state management and high-performance data rendering.
- Designed and implemented **Java Spring Boot** microservices, ensuring secure, scalable operations and integration with messaging systems for asynchronous processing.
- Managed and optimized data persistence using **PostgreSQL** relational databases and integrated with **AWS RDS** instances for scalable data storage.
- Developed asynchronous messaging patterns using **Apache Kafka** to decouple services and manage event streams for critical backend processes.
- Containerized applications using **Docker** and deployed them to **AWS EKS**, managing configurations and ensuring consistent deployment across environments.
- Constructed and documented **RESTful APIs** that facilitated seamless communication between frontend and backend systems, supporting data exchange for core application features.
- Participated in rigorous **code reviews**, wrote comprehensive **unit and integration tests**, and maintained high standards for code modularity and documentation within an Agile Scrum framework.

SKILLS

Frontend – Angular, TypeScript, HTML5, CSS3, RxJS, NgRx, Component-Driven UI.

Backend – Java, Spring Boot, Spring Ecosystem, Spring Cloud, Spring Security, Microservices, RESTful APIs, Apache Kafka.

Database & Storage – PostgreSQL, AWS RDS, NoSQL.

Cloud & DevOps – AWS, EKS, S3, Docker, Kubernetes, CI/CD, Git, Maven, Gradle.

Development Practices – Code Reviews, Unit Testing, Integration Testing, Agile Scrum, Documentation.

PROJECTS

Enterprise Java Microservice Platform

- Developed a suite of **Java Spring Boot** microservices to manage core business logic, replacing a monolithic application and improving system modularity.
- Implemented asynchronous communication patterns using **Apache Kafka** for event-driven data processing between services, enhancing system resilience and scalability.
- Designed and implemented data persistence layers using **JPA and Hibernate** with **PostgreSQL**, ensuring efficient data retrieval and transaction management.

Angular-Based Customer Portal

- Built a responsive **Angular** customer portal, integrating with backend **RESTful APIs** to display dynamic user data and facilitate interactive workflows.
- Managed frontend state using **NgRx**, ensuring predictable data flow and enabling complex UI interactions for a seamless user experience.
- Wrote comprehensive **unit tests** for Angular components and services, achieving over 85% code coverage and ensuring application stability.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
