PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and enhanced **Java Spring Boot** microservices, implementing RESTful APIs for core ordering functionalities, processing approximately 5,000 requests per minute during peak hours.
- Designed and built modern **React** web applications to create intuitive user experiences for both customers and internal operators, contributing to a 15% improvement in user task completion rates.
- Managed and improved the reliability of production systems by implementing comprehensive monitoring and alerting using **AWS CloudWatch** and **Splunk**, reducing critical incident response times by 22%.
- Collaborated with product stakeholders and operational teams to translate complex business problems into pragmatic software solutions, making sound trade-offs between speed and long-term maintainability.
- Wrote well-tested, maintainable code and actively participated in code reviews, contributing to a 10% increase in team velocity and adherence to engineering standards.
- Containerized backend services using **Docker** and deployed them to **AWS EC2** instances, ensuring consistent environments across development and production.
- Worked closely with operations teams to troubleshoot issues, improve system reliability, and raise the quality bar across the ordering platform.

SKILLS

Languages – Java, Python, SQL, JavaScript, TypeScript

Backend – Spring Boot, REST APIs, Hibernate, JPA, Microservices, FastAPI

Frontend – React, Angular, HTML, CSS

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Tools & Methodologies – Jira, Confluence, Agile, Scrum, Linux Shell Scripting

PROJECTS

Order Management System Enhancement (HCL Technologies)

- Developed new features for a **Java Spring Boot** order processing system, including enhancements to the **Hibernate** persistence layer to support increased transaction volumes.
- Integrated the ordering system with downstream enterprise business systems via **REST APIs** and direct database flows, improving data consistency across platforms.
- Authored comprehensive technical documentation and runbooks for the order management system, facilitating smoother knowledge transfer and reducing onboarding time for new support engineers.

Customer Ordering Portal Refinement (MSc Project)

- Built a responsive customer-facing web application using **React** and **TypeScript** to streamline the order placement process, enhancing user experience and reducing cart abandonment by 18%.
- Implemented a **FastAPI** backend service to handle order submissions and integrate with a mock fulfillment API, processing approximately 500 orders per hour.
- Designed and deployed the application on **AWS Lambda** and **API Gateway**, ensuring scalability and cost-effectiveness for a simulated high-traffic scenario.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
