PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Implemented **Python**-based AI agents and agentic workflows, integrating them with **REST APIs** and **PostgreSQL** databases to automate business processes.
- Authored clean, maintainable **Java Spring Boot** code for feature enhancements and bug fixes on enterprise applications, adhering to team coding standards.
- Developed and maintained **Python** scripts for data pipeline automation and ETL processes, supporting scheduled reporting for operational teams.
- Participated in rigorous **code reviews**, providing constructive feedback and learning from senior engineers to enhance code quality and team standards.
- Wrote comprehensive **unit tests** and integration tests for **Java Spring Boot** applications, ensuring code reliability and adherence to acceptance criteria.
- Collaborated with business stakeholders to gather requirements for new features and bug fixes, translating them into actionable technical tasks within an **Agile/Scrum** framework.
- Containerized **Java** applications using **Docker** and deployed them to **AWS EC2** instances, managing basic configurations and resource allocation.

SKILLS

Languages – Python, Java, SQL, TypeScript, JavaScript

Frameworks/Libraries – Spring Boot, REST APIs, pandas, NumPy, scikit-learn

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle, NoSQL

AI/ML – LLM integrations, Agent frameworks, Prompt engineering, Machine learning fundamentals

Tools – Jira, Confluence, Splunk, Dynatrace

PROJECTS

AI Agent for Business Process Automation

- Developed an AI agent using **Python** and **LangChain** to automate a key business reporting workflow, integrating with **PostgreSQL** for data retrieval.
- Designed and implemented agentic logic for handling edge cases and exceptions, reducing manual intervention by approximately **30%** for the targeted process.
- Containerized the agent application with **Docker** for streamlined deployment on cloud infrastructure, ensuring consistent execution environments.

Automated Data Processing Pipeline

- Engineered a **Python**-based data pipeline using **pandas** to ingest, transform, and load data from disparate sources into a centralized data store.
- Implemented scheduled jobs using **cron** and shell scripting on **Linux**, ensuring daily data refreshes for operational dashboards, processing roughly **5,000** records per run.
- Collaborated with the operations team to define data requirements and validate output accuracy, improving data availability for downstream analytics.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
