PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented high-performance **Java 17** microservices using **Spring Boot** and **Hibernate**, managing data persistence for core financial operations.
- Developed and maintained **Spring Boot** REST APIs, facilitating cross-service communication and integrating with downstream systems for an enterprise payments dashboard.
- Engineered robust data pipelines using **Python** and **pandas** to automate ETL processes and generate scheduled operational reports, processing approximately 50GB of data daily.
- Contributed to the design and implementation of innovative capabilities using **AI Tooling**, integrating machine learning models into existing Java-based solutions.
- Participated in agile team ceremonies, including sprint planning and code reviews, ensuring adherence to coding best practices and delivering features within sprint timelines.
- Containerized Java applications using **Docker** and deployed them to a **Kubernetes** cluster, managing configurations and ensuring consistent environments across development and production.
- Managed production incidents for enterprise applications, performing root cause analysis and implementing fixes to meet strict SLAs, reducing critical incident resolution time by 15%.

SKILLS

Languages – Java, Python, SQL, Shell Scripting

Frameworks/Libraries – Spring Boot, Hibernate, Spring, pandas, NumPy

Databases – PostgreSQL, MySQL, Oracle

Cloud/DevOps – AWS, Docker, Kubernetes, Jenkins, Git

Tools/Platforms – Jira, Confluence, Splunk, Dynatrace, Maven, Gradle, JSON

AI/ML – AI Tooling, Machine Learning Concepts

PROJECTS

Java-Based Payment Transaction Monitoring System

- Developed a **Java** microservice with **Spring Boot** and **Hibernate** to process and monitor real-time payment transactions, ensuring data integrity and operational visibility.
- Implemented robust error handling and alerting mechanisms for failed or stalled payment messages, reducing manual intervention by approximately 40% for the operations team.
- Integrated the service with existing enterprise systems via REST APIs, providing transaction status updates and supporting reconciliation workflows.

Python-Driven ETL and Reporting Automation

- Built **Python** scripts to automate the extraction, transformation, and loading of data from multiple sources into a data warehouse for reporting purposes.
- Designed and implemented data validation checks within the **pandas** pipelines, catching over 30% of data quality issues before they impacted downstream reports.
- Scheduled and managed batch jobs using cron and Jenkins, delivering daily operational reports to business stakeholders on time.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
