PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and implemented high-performance **Java** solutions for innovative capabilities using AI tooling, contributing to new product lines.
- Designed and built **Spring Boot** microservices with **Hibernate**, managing complex data persistence layers for enterprise applications.
- Engineered robust **Java** backend services incorporating **JPA**, ensuring efficient data access and transactional integrity across distributed systems.
- Collaborated within an agile team, participating in sprint planning, technical estimations, and code reviews to ensure high-quality software delivery.
- Researched and proposed alternative technical solutions to adapt to evolving business requirements, documenting findings and design proposals.
- Containerized **Java** applications using **Docker** and deployed them to **Kubernetes** clusters, managing configurations and resource allocation.
- Authored comprehensive design and research documentation for R&D; initiatives, facilitating knowledge transfer and transition to core product teams.

SKILLS

Languages – Java, Python, SQL, Shell Scripting, JSON

Frameworks/Libraries – Spring Boot, Hibernate, JPA, JUnit, React

Tools/Platforms – Docker, Kubernetes, Jenkins, Gradle, Maven, Git, Jira, Confluence, Splunk, Dynatrace, AWS, Linux

Databases – PostgreSQL, MySQL, Oracle

AI/ML – AI Tooling, Practical AI Workflow Concepts

Methodologies – Agile, Scrum

PROJECTS

AI-Powered Transaction Processing Engine

- Developed a **Java Spring Boot** application to process high-volume financial transactions, integrating AI tooling for anomaly detection.
- Implemented REST APIs for seamless integration with downstream services, ensuring efficient data exchange and system interoperability.
- Containerized the application using **Docker** and deployed to a **Kubernetes** environment, managing service discovery and load balancing.

Real-time Payments Analytics Dashboard

- Built a **Java** backend service to aggregate and analyze real-time payment data, supporting operational monitoring and reporting.
- Designed the data model and persistence layer using **JPA** and **PostgreSQL** to efficiently store and retrieve transaction details.
- Developed automated unit tests using **JUnit**, achieving over 85% code coverage for critical business logic components.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
