PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** REST APIs to support new platform features, integrating with PostgreSQL and ensuring data consistency across services.
- Developed and maintained **Hibernate** ORM mappings and JPQL queries for the core data persistence layer, optimizing entity retrieval and reducing database load by **18%**.
- Authored **JUnit** and **Mockito** tests for critical Java components, achieving **85%** code coverage and significantly reducing production defects for new feature releases.
- Automated deployment processes for a suite of microservices using **Jenkins** pipelines, incorporating stages for automated testing, security scans, and manual approval gates, reducing deployment lead time by **40%**.
- Participated in **on-call rotations**, responding to P1/P2 incidents for enterprise applications, performing root cause analysis using **Splunk** logs, and coordinating remediation efforts to meet **SLA targets**.
- Containerized several Java applications using **Docker** and managed their deployment to **AWS EC2** instances, ensuring consistent environments across development, staging, and production.
- Collaborated with development and operations teams to refine **CI/CD** practices, conducting code reviews and providing technical guidance to junior engineers on best practices for reliable software delivery.

SKILLS

Languages – Java, Python, SQL, Bash

Frameworks/Libraries – Spring Boot, Hibernate, JUnit, Mockito, pandas, NumPy

Databases – PostgreSQL, MySQL, Oracle

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux

Observability – Splunk, Dynatrace

Methodologies – Agile, Scrum, CI/CD, Incident Response

PROJECTS

Java Microservice for Transaction Processing

- Developed a **Java Spring Boot** microservice responsible for ingesting and processing financial transaction data, handling an average of **1,500 transactions per hour**.
- Implemented robust error handling and retry mechanisms using **Hibernate** to ensure data integrity and fault tolerance during message processing.
- Integrated the service with a **PostgreSQL** database for persistent storage and retrieval of transaction records, writing custom JPQL queries for reporting needs.

Python Automation for Production Monitoring Alerts

- Created Python scripts to parse logs from **Splunk** and **CloudWatch**, identifying critical error patterns and automatically generating alerts for the operations team.
- Developed scheduled reporting scripts using **pandas** to summarize daily system health metrics and identify trends, which were then shared with business stakeholders.
- Automated the deployment and configuration of monitoring agents on **AWS EC2** instances using shell scripts and cron jobs, reducing manual setup time by **60%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
