PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Contributed to the design and development of new products, translating conceptual ideas into manufacturable designs for enterprise construction projects.
- Collaborated with workshop teams to fabricate and test prototypes, ensuring designs met functional and aesthetic requirements for diverse construction applications.
- Assisted in the creation and refinement of engineering drawings, ensuring accuracy and adherence to industry standards for production and assembly.
- Participated in Agile ceremonies, including sprint planning and reviews, to contribute to the iterative development of product designs and manufacturing processes.
- Analyzed design challenges and proposed practical solutions, demonstrating a strong problem-solving mindset and meticulous attention to detail in a fast-paced engineering environment.
- Gained practical experience in **CAD software**, producing 3D models and 2D technical drawings for components used in large-scale building projects.
- Supported the implementation of new manufacturing techniques, documenting processes and assisting with the integration of updated designs into the production workflow.

SKILLS

Engineering – Mechanical Engineering, Manufacturing Engineering, Agricultural Engineering, Design, Product Development, Prototyping, Engineering Drawings, CAD Software

Software & Tools – Jira, Confluence, Git, Jenkins, Docker, Linux, Shell Scripting, Python, Java, Spring Boot, SQL, PostgreSQL, MySQL, Oracle, Splunk, Dynatrace

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch)

Data Analytics – Power BI, Tableau, R, pandas, NumPy, scikit-learn, DAX, Power Query, Data Modelling, Data Warehousing

Methodologies – Agile, Scrum, Change Management

Domain Knowledge – Payments Operations Dashboard, Transaction Monitoring, Reconciliation Workflows, ERP Integration Support

PROJECTS

Construction Component Design System

- Developed a modular design system for standardized construction components, integrating **CAD models** and material specifications for repeatable manufacturing.
- Created detailed **engineering drawings** and assembly instructions, reducing fabrication errors by approximately 18% across a pilot batch of components.
- Collaborated with the workshop team to iterate on designs based on feedback, improving the assembly efficiency of key structural elements by 12%.

Automated Design Verification Tool

- Built a **Python script** to automate the verification of critical dimensions and tolerances against design specifications, ensuring compliance for manufacturing.
- Integrated the script with a local **Git repository** for version control, enabling efficient tracking of design changes and validation results.
- Generated automated reports summarizing design compliance, providing actionable insights to the engineering team for faster design sign-off.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
