PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** microservices, designing and implementing **REST APIs** for internal data exchange, handling approximately 1,500 requests per minute.
- Enhanced a **Java Spring Boot** application by implementing **Hibernate** and **JPA** for complex data persistence operations, improving data retrieval efficiency by 18% across core entities.
- Authored comprehensive unit tests using **JUnit** and **Mockito** for new **Java** features, achieving over 90% code coverage for critical business logic modules.
- Participated in **code reviews** for a team of 4 junior engineers, providing constructive feedback to ensure adherence to coding standards and improve overall code quality.
- Contributed to **sprint planning** and **technical estimation** sessions, breaking down complex user stories into actionable development tasks for bi-weekly Agile sprints.
- Containerized backend services using **Docker** and managed deployments to **AWS EC2** instances, streamlining the build and deployment process.
- Automated data validation and reporting tasks using **Python scripting**, reducing manual effort by 10 hours per week for the operations team.

SKILLS

Languages – Java, Python, SQL, R

Frameworks/Libraries – Spring Boot, Hibernate, JPA, JUnit, Mockito, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Tools/Platforms – Splunk, Dynatrace, Jira, Confluence, Power BI, Tableau

Methodologies – Agile, Scrum

PROJECTS

Enterprise Java Application Modernisation

- Refactored a legacy Java module into a **Spring Boot** microservice with **RESTful APIs**, improving system modularity and maintainability.
- Implemented **Hibernate** for data access layer, optimizing database interactions and reducing query execution times by an average of 22% for key transactions.
- Developed a suite of **JUnit** tests to ensure functional correctness and stability during the migration, covering core business logic and API endpoints.

Python Data Pipeline for Financial Reporting

- Engineered a **Python** ETL pipeline to extract, transform, and load data from multiple **PostgreSQL** and **MySQL** databases into a data warehouse.
- Automated the generation of daily operational reports using **pandas**, reducing report generation time from 4 hours to under 30 minutes.
- Integrated the pipeline with **Jenkins** for scheduled execution, ensuring reliable and timely delivery of critical business intelligence data.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
