PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot applications**, implementing new features and resolving defects in production systems.
- Engineered **Python scripts** for data pipeline automation and ETL processes, improving data ingestion efficiency by approximately **15%**.
- Managed **SQL database operations** across PostgreSQL, MySQL, and Oracle, performing ad-hoc queries, data validation, and schema adjustments.
- Collaborated with cross-functional teams to design and implement **simple, scalable, and reliable software solutions** for patient care systems.
- Troubleshooted and resolved **production incidents**, participating in blameless post-mortems and implementing corrective actions.
- Containerized applications using **Docker** and deployed them to **Kubernetes clusters**, managing configurations and resource allocation.
- Contributed to the development and maintenance of **CI/CD pipelines** using Jenkins and Git for efficient code integration and deployment.

SKILLS

Languages – Java, Python, SQL, C#

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Containerization & Orchestration – Docker, Kubernetes

CI/CD & Version Control – Jenkins, Git, JFrog

Databases – PostgreSQL, MySQL, Oracle

Development Frameworks – Spring Boot

Monitoring & Observability – Dynatrace, Splunk, CloudWatch

PROJECTS

Connected Cardiac Device Data Platform

- Developed a **Java Spring Boot backend service** to ingest and process real-time data streams from connected medical devices, ensuring high availability.
- Implemented secure **REST APIs** for data access, integrating with downstream clinical analysis tools and adhering to strict data privacy standards.
- Containerized the platform services using **Docker** and orchestrated deployments on a **Kubernetes** cluster, enhancing scalability and resilience.

Patient Monitoring System Enhancements

- Built **Python automation scripts** to streamline the deployment and configuration of monitoring agents across a fleet of **AWS EC2** instances, reducing manual effort by **30%**.
- Designed and implemented **CI/CD pipelines** with **Jenkins** and **Git** to automate build, test, and deployment processes for patient care system updates.
- Managed **PostgreSQL database** schema changes and performance tuning for the patient data repository, supporting critical reporting requirements.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
