PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Provided technical guidance to enterprise customers on API integration best practices, diagnosing and resolving issues across their development lifecycles.
- Developed an internal Python script to automate the generation of customer-specific integration reports, reducing manual effort by approximately 8 hours per week.
- Collaborated with engineering teams to debug and triage customer-reported bugs, translating complex technical challenges into actionable insights for product roadmap influence.
- Designed and implemented a comprehensive knowledge base for customer self-service, including step-by-step guides and troubleshooting FAQs, improving first-contact resolution rates.
- Managed customer escalations via a ticketing system, performing root cause analysis using internal observability tools and documenting findings for broader team awareness.
- Authored detailed technical documentation and runbooks for internal teams, standardizing troubleshooting procedures for common customer-facing issues.
- Containerized internal support tooling using Docker, deploying to an AWS EC2 instance to ensure consistent environments and simplify deployment.

SKILLS

Support & Troubleshooting – Customer Escalations, Technical Guidance, API Integration, Debugging, Triage, Root Cause Analysis, Observability Tools, Ticketing Systems

Programming & Scripting – Python, SQL, REST APIs

Cloud & Infrastructure – AWS (EC2, CloudWatch), Docker

Documentation & Knowledge Management – Knowledge Base, Technical Documentation, Runbooks, FAQs

Development Tools & Methodologies – Git, Jenkins, Agile, Scrum, Jira, Confluence

PROJECTS

Customer Integration Support Tooling

- Developed a Python-based CLI tool to assist customers in validating their API payloads against Metronome's schemas before submission, catching ~65% of integration errors early.
- Integrated the tool with a PostgreSQL database to store historical validation results, enabling easier debugging of past integration attempts for customer success teams.
- Authored user guides and conducted walkthrough sessions for the customer success team on effectively using the tool to onboard new clients faster.

Internal Observability Dashboard Enhancement

- Extended existing Python scripts to ingest and process logs from customer-facing services into a centralized data store, improving visibility into application behavior.
- Designed and implemented key metrics within an internal dashboard (using generic BI tooling principles) to track customer API usage patterns and identify potential performance bottlenecks.
- Collaborated with operations teams to define alerting thresholds based on processed log data, proactively identifying potential customer-impacting issues.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
