PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Managed production environments for enterprise applications, focusing on **SLA adherence** and **P1/P2 incident response** across Splunk and Dynatrace dashboards.
- Developed Python scripts to automate data ingestion and scheduled reporting tasks, supporting ETL processes and enhancing data pipeline efficiency.
- Executed ad-hoc SQL queries and managed schema changes across PostgreSQL, MySQL, and Oracle databases for data validation and integrity.
- Designed and deployed **system monitoring dashboards** using a combination of AWS CloudWatch and Splunk to proactively detect and alert on emerging customer-facing incidents.
- Diagnosed live incidents on a multi-cloud database-as-a-service platform, differentiating between platform and usage issues to expedite resolution.
- Automated routine monitoring and troubleshooting tasks through shell scripting and Python, reducing manual intervention by an estimated **15%**.
- Contributed to the documentation of **troubleshooting workflows** and standard operating procedures (SOPs) for common corner-case scenarios.

SKILLS

Cloud Platforms – Amazon Web Services (AWS), EC2, S3, Lambda, CloudWatch, GCP, Azure

Databases – MongoDB, PostgreSQL, MySQL, Oracle, NoSQL, Database Operations

Operating Systems – Linux System Administration, Shell Scripting

Networking – DNS, TCP/IP

Languages & Scripting – Python, Java, SQL, Javascript

Tools & Technologies – Docker, Kubernetes, Jenkins, Git, Splunk, Dynatrace, Jira, Confluence

PROJECTS

Cloud Operations Dashboard Development

- Engineered a comprehensive monitoring dashboard using **AWS CloudWatch** and **Splunk** to provide real-time visibility into system health and customer-facing incidents.
- Automated alert aggregation and initial triage processes with Python scripts, enabling faster differentiation between platform and usage-related issues.
- Developed runbooks for common operational scenarios, improving Mean Time to Resolve (MTTR) for critical alerts by approximately **20%**.

Automated Incident Triage System

- Built a Python-based system to parse and analyze logs from diverse sources, identifying patterns indicative of potential system-wide issues.
- Integrated with ticketing systems to automate the creation and initial classification of P1/P2 incidents, reducing manual assignment time.
- Implemented basic anomaly detection logic to flag unusual system behavior, contributing to proactive incident resolution.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
