PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** microservices for core product functionality, focusing on state management for distributed MongoDB clusters.
- Developed asynchronous, multi-threaded backend services in **Java** to handle high-volume data ingestion and processing for global-scale deployments.
- Engineered and maintained **Hibernate** ORM mappings and JPQL queries for efficient data persistence and retrieval within enterprise applications.
- Contributed to the design and development of **Ops Manager** features, focusing on robust error handling and system resilience for large-scale deployments.
- Participated in technical estimations and sprint planning sessions, translating complex system requirements into actionable development tasks for the team.
- Collaborated with senior engineers to troubleshoot and resolve production bugs impacting customer deployments, ensuring system stability and performance.
- Containerized application components using **Docker** and deployed them to **AWS EC2** instances, managing container lifecycles and basic resource allocation.

SKILLS

Languages – Java, Go, Python, Javascript, React, SQL

Frameworks/Libraries – Spring Boot, Hibernate, JPA, Spring Cloud, React

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Github Actions, Jenkins, Bazel, GCP, Azure

Databases – MongoDB, PostgreSQL, MySQL, Oracle

Concepts – Distributed Systems, Multi-threading, Asynchronous Programming, Object-Oriented Design, Data Structures, Algorithms, CI/CD, Agile Methodologies

PROJECTS

Distributed Systems Core for Ops Manager

- Developed a **Java Spring Boot** service to manage the lifecycle and state of distributed MongoDB clusters across various infrastructures.
- Implemented asynchronous task processing using **Java concurrency** primitives to ensure fault tolerance and handle concurrent operations for cluster provisioning.
- Integrated with **AWS Lambda** for event-driven automation of cluster state transitions, reducing manual intervention by approximately **40%**.

Customer Deployment Automation Toolkit

- Built a Python-based CLI tool to automate the configuration and deployment of MongoDB clusters on private cloud platforms, interacting with customer environments.
- Designed and implemented RESTful APIs using **FastAPI** to orchestrate deployment workflows, integrating with customer's existing infrastructure management tools.
- Wrote comprehensive documentation and usage examples for the toolkit, enabling faster onboarding for customer engineering teams and reducing initial setup time by **3 days**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
