PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** RESTful APIs for core backend services, handling approximately **1,500 requests per minute** during peak hours.
- Implemented **Hibernate**-based data access layers for enterprise applications, optimizing complex queries to reduce database load by **18%**.
- Designed and coded **JUnit** test suites and employed **Mockito** for mocking dependencies, achieving over **85% code coverage** for critical business logic.
- Integrated with **RabbitMQ** for asynchronous messaging, building message consumers and producers for event-driven workflows across microservices.
- Contributed to feature development across the company's API, Compliance Portal, and Operations Portal, working within an **Agile/Scrum** framework.
- Collaborated on API integrations with third-party **KYC/KYB providers** and **AML platforms**, ensuring secure data exchange via **OAuth flows**.
- Containerized backend services using **Docker** and managed deployments to cloud environments, ensuring consistent application behaviour across development and production.

SKILLS

Languages – C#, SQL, JavaScript, TypeScript

Frameworks & Libraries – .NET 8+, MediatR, Spring Boot, Hibernate, JUnit, Mockito

Messaging & Queues – RabbitMQ

Databases – SQL Server, PostgreSQL

Cloud & Containerization – AWS, Docker, Azure

Protocols & Concepts – API, HTTP, OAuth, Webhooks, Event-Driven Architecture

PROJECTS

Enterprise Payments Processing API (HCL Technologies)

- Engineered a **Java Spring Boot** microservice to handle inbound transaction messages, performing initial validation and routing to downstream systems.
- Developed a **Hibernate** and **PostgreSQL**-backed data persistence layer to store transaction details, supporting reconciliation workflows and audit trails.
- Implemented RESTful endpoints for system integrations, adhering to strict security protocols and logging mechanisms for operational monitoring.

Financial Operations Dashboard Enhancement (HCL Technologies)

- Automated the generation of daily operational reports using **Python** scripts, consolidating data from multiple sources into a unified format.
- Refactored SQL queries for improved performance on the payments dashboard, reducing data retrieval times by an average of **22%** for key operational views.
- Assisted in the triaging of production incidents related to transaction monitoring, identifying root causes and contributing to issue resolution within SLA targets.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
