+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • Stamp 1G — Full-Time Work Eligible

PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Consulted with **enterprise clients** to gather detailed requirements for the **Trade and Market Surveillance platform**, translating complex needs into actionable functional specifications.
- Analyzed **customer data schemas** and identified key enhancement opportunities within high-volume, **time-series datasets**, improving data integration efficiency by approximately **18%**.
- Designed and documented **ETL workflows** and data transformation processes using flow diagrams, contributing to the development of robust data ingestion pipelines for financial analytics.
- Wrote clear and detailed **functional/technical specifications (FRS)** based on business requirements (BRDs), ensuring alignment between client expectations and engineering deliverables.
- Performed **QA on implementations** of surveillance alerts, meticulously verifying alert logic and tuning parameters to achieve high alert quality and minimize false positives.
- Collaborated closely with **engineers and stakeholders** across the product lifecycle, facilitating effective communication and ensuring timely delivery of platform enhancements.
- Managed and prioritized competing tasks effectively within an Agile framework, ensuring proactive progress on multiple client engagements and internal development initiatives.

SKILLS

Core Competencies – Business Analysis, Financial Services, Requirements Gathering, Data Analysis, Process Design, Stakeholder Management, Agile Methodologies, Problem Solving

Data & Analytics – SQL, Time-Series Data, Data Schemas, ETL Workflows, Data Modelling, Data Warehousing, Data Validation

Financial Domain – Trade Surveillance, Market Microstructure, Trading Workflows, Regulatory Compliance (generic)

Tools & Technologies – Power BI, Tableau, Python, R, Jira, Confluence, Git, Jenkins, AWS, Docker

Documentation & Design – BRD, FRS, UML Diagrams, Flow Diagrams, Technical Specifications

PROJECTS

Client Data Analysis for Surveillance Platform Enhancement

- Engaged with **enterprise clients** to understand their specific trading data structures and reporting requirements for market surveillance.
- Analyzed large, **time-series datasets** (millions of records per day) to identify patterns, anomalies, and opportunities for optimizing alert generation logic.
- Developed detailed **functional specifications** for data transformation and feature engineering pipelines to support enhanced surveillance capabilities.

ETL Workflow Design for Financial Data Ingestion

- Designed and documented end-to-end **ETL workflows** for ingesting and processing diverse financial market data streams, ensuring data integrity and timeliness.
- Created **flow diagrams and UML diagrams** to visually represent data processing logic and system integrations, facilitating clear communication with engineering teams.
- Wrote **SQL queries** for data validation and transformation, ensuring that processed data accurately reflected source system information.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
