PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Architected and developed analytical solutions by translating business requirements into actionable insights using **SQL** and **Python** for healthcare trend analysis.
- Designed and maintained user-friendly **Power BI** dashboards to visualize clinical data from diverse sources, delivering tailored analytical insights to senior leadership.
- Led the identification and execution of process improvement and automation opportunities within the data analytics workflow, reducing manual effort by an estimated **15%**.
- Provided direct people leadership, coaching, and development to a team of **3 analysts**, setting priorities and ensuring high-quality, timely deliverables.
- Presented actionable analytic findings and guidance to senior organizational leaders, translating complex data into clear, understandable narratives.
- Gained subject matter expertise through individual research and self-guided analyses, proactively developing solutions to anticipate customer needs and forecast business impact.
- Contributed to departmental standards for data governance and project validation, ensuring adherence to best practices in analytical project execution.

SKILLS

Analytics & BI Tools – Power BI, Tableau, DAX, Power Query, R / RStudio

Programming & Scripting – Python, R, SQL

Data Management & Warehousing – Data Modelling, Data Warehousing, ETL

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Methodologies & Practices – Agile/Scrum, Data Governance, Project Planning, Validation, Documentation

PROJECTS

Healthcare Cost & Utilization Analytics Dashboard

- Developed a comprehensive **Power BI** dashboard integrating data from multiple sources to track key drivers of healthcare costs and utilization trends.
- Engineered complex **SQL** queries and **Python** scripts to extract, transform, and load data, building robust data models for analytical reporting.
- Collaborated with clinical stakeholders to define key performance indicators and ensure the dashboard provided actionable insights for strategic decision-making.

MSc Applied Data Analytics Project: Patient Readmission Predictor

- Designed and implemented a predictive model using **scikit-learn** (Python) to identify patients at high risk of readmission, trained on a dataset of **~150,000 patient records**.
- Extracted and engineered features related to patient demographics, treatment history, and socio-economic factors using **pandas** and **SQL**.
- Evaluated model performance using AUC, achieving an AUC of approximately **0.82** on a held-out test set, and presented findings to academic advisors.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
