PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Owned direct relationships with CX leadership, acting as a trusted analytical partner to translate business requirements into actionable insights, improving efficiency in customer support workflows by an estimated **15%**.
- Developed and maintained **dbt models** that powered key CX reporting, ensuring a single source of truth for metrics like onboarding health and CSAT trends across the analytics department.
- Designed and implemented **LLM-powered analytical workflows** using Claude to analyze unstructured data from support tickets and customer feedback, identifying key drivers of customer satisfaction and churn.
- Built automated reporting and alerting pipelines using **Python and SQL**, replacing manual analytical tasks and reducing the time spent on routine reporting by approximately **30%**.
- Partnered with CX Operations and Product teams to define and implement metric definitions and maintain data dictionaries for critical CX KPIs, enhancing data consistency and trust.
- Proactively surfaced anomalies and risks in CX data, presenting a clear point of view on potential solutions and contributing to a **10% reduction** in critical customer escalations within one quarter.
- Containerized analytical workflow services using **Docker** and deployed them to an **AWS EKS** cluster, ensuring scalable and reliable execution of AI-driven analysis pipelines.

SKILLS

BI & Analytics Tools – Power BI, Tableau, dbt, Looker, DAX, Power Query

Programming & Scripting – Python, SQL, R

AI & Machine Learning – LLM, Claude, GPT, scikit-learn, NLP, Machine Learning Fundamentals

Cloud & DevOps – AWS, Docker, Kubernetes, EKS

Data Engineering & Warehousing – ETL, Data Modelling, Data Warehousing

CRM & CX Platforms – Salesforce, HubSpot, Gainsight

Automation & Workflow Tools – n8n, Zapier, Make, API Calls

PROJECTS

AI-Powered Customer Feedback Analysis Platform

- Developed an end-to-end workflow using **Python** and **Claude API** to ingest and analyze unstructured customer feedback from support tickets and surveys, identifying sentiment trends and common pain points.
- Built a **FastAPI** service to expose insights from the feedback analysis, enabling CX stakeholders to query key themes and sentiment scores, which informed product iteration and support strategy.
- Quantified the impact of identified feedback themes on customer satisfaction, demonstrating a correlation that guided prioritisation efforts and contributed to an estimated **8% improvement** in CSAT for targeted areas.

Automated CX Metrics Reporting and Alerting

- Engineered automated data pipelines using **Python** and **SQL** to extract, transform, and load data from CRM and support systems into a central data mart for CX reporting.
- Created interactive **Power BI dashboards** to visualize key CX metrics including onboarding health, support ticket volume, and resolution times, providing self-serve analytics capabilities to the CX leadership team.
- Implemented custom alerting logic within the pipeline to notify relevant teams of significant deviations in CSAT scores or increases in critical support ticket types, reducing response times by an average of **2 hours**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
