PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **Looker dashboards** and explored to surface key product usage, engagement, and retention metrics for stakeholders across the business, enabling data-informed decision-making.
- Conducted deep-dive analyses into **user behaviour** and feature adoption patterns, identifying churn signals and surfacing actionable insights that directly informed product roadmap decisions for the core platform.
- Defined and maintained a comprehensive **product metrics framework**, ensuring consistency in KPI measurement and reporting across multiple product teams and enhancing data integrity.
- Supported **A/B testing** initiatives by collaborating with product teams on experiment design, interpreting statistical results, and facilitating data-driven decision-making for feature releases.
- Partnered with **Product Managers** and engineering teams to define success metrics for new features, instrumenting code to capture essential product usage data and measure impact.
- Proactively monitored critical **product metrics**, identifying and flagging anomalies, emerging trends, and potential opportunities to relevant teams, ensuring timely intervention.
- Contributed to enhancing data literacy across product teams by coaching members on **self-serve analytics**, effective dashboard utilization, and metric interpretation principles.

SKILLS

Product Analytics – User Behaviour Analysis, Feature Adoption, Churn Analysis, A/B Testing, Experimentation, Funnel Metrics, Retention Metrics, Engagement Metrics

BI & Visualization – Looker, LookML, Dashboards, Data Visualization, Data Storytelling

Data Analysis & Querying – SQL, Complex Queries, Large Datasets, Data Modelling, Data Warehousing, ETL, Power Query

Programming & Scripting – Python, R, Pandas, NumPy, Scikit-learn

Methodologies & Tools – Agile, Scrum, Jira, Confluence, Git, CI/CD

Cloud & Databases – AWS, PostgreSQL, MySQL, Oracle

PROJECTS

Product Analytics Framework for Customer Engagement

- Developed a comprehensive **product metrics framework** using SQL and **Looker**, establishing clear definitions for user engagement, feature adoption, and retention KPIs.
- Built interactive **Looker dashboards** to visualize key performance indicators for customer onboarding and feature usage, presenting findings to product management and engineering leads.
- Analyzed **user behaviour** data to identify friction points in the customer journey, recommending specific product improvements that led to a 15% increase in feature adoption.

A/B Testing Analysis for New Feature Rollout

- Designed and executed **A/B tests** for a new in-app feature, defining success metrics and hypothesis in collaboration with product managers.
- Performed rigorous statistical analysis on experimental data using **Python** (Pandas, SciPy) to interpret results, determining the statistically significant impact on user engagement.
- Presented findings and data-driven recommendations on feature viability to product and leadership teams, influencing the go/no-go decision for the full rollout.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
