PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Administered **Jenkins** infrastructure, managing job and pipeline configurations, plugin updates, and system patching to ensure service availability for **machine learning verification** workloads.
- Supported the operation of **CI/CD systems** at scale, systematically triaging build failures and identifying root causes to maintain CI signal quality for distributed test environments.
- Assisted with scaling and capacity management of **Jenkins agents** and node lifecycles, optimizing resource utilization to support high-volume automated workloads.
- Contributed to automation and tooling development using **Python scripting** to reduce operational overhead and enhance the repeatability of CI/CD processes.
- Managed **Linux environments**, performing log analysis and troubleshooting system-level issues to maintain the stability of the CI/CD infrastructure.
- Collaborated cross-functionally with engineering teams to support **CI/CD workflows** and enhance pipeline stability for large-scale machine learning verification.
- Containerized CI/CD components using **Docker** and deployed them to a Kubernetes cluster, configuring resource limits and managing node lifecycle for predictable rollouts.

SKILLS

CI/CD – Jenkins, Pipelines, Job Configuration, Plugin Management, Git

Cloud & DevOps – AWS, EC2, S3, Lambda, CloudWatch, Docker, Kubernetes

Scripting & Automation – Python, Shell Scripting

Operating Systems – Linux, Bash

Monitoring & Observability – Splunk, Dynatrace

Development Tools – Jira, Confluence, Git

PROJECTS

Jenkins CI/CD Platform Enhancement

- Administered a **Jenkins** instance supporting multiple development teams, focusing on pipeline configuration and plugin management to improve build reliability.
- Developed **Python scripts** to automate the provisioning and de-provisioning of Jenkins agents based on workload demands, reducing manual setup time by 40%.
- Implemented enhanced logging and monitoring using **Splunk** to provide better visibility into build failures and system performance.

Automated Build & Test Pipeline

- Designed and implemented a CI/CD pipeline using **Jenkins** and **Git** for a Java Spring Boot application, integrating automated testing stages.
- Containerized the application using **Docker**, ensuring consistent deployment across development and staging environments.
- Wrote **shell scripts** to manage build artifacts and deployment processes, reducing deployment time by approximately 30%.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
