PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Diagnosed and resolved complex customer-reported issues for Qumulo's unstructured data platform, focusing on cloud file systems (AWS/Azure), permissions, and performance bottlenecks.
- Managed the full lifecycle of escalated customer tickets, from initial triage through root cause analysis to final resolution, ensuring clear communication with clients and internal teams.
- Collaborated with Sales and Product Management teams to gather customer requirements and provide detailed feedback on product gaps, particularly concerning cloud storage and identity management features.
- Developed Python scripts to automate routine diagnostic tasks and data collection for complex support cases, reducing average issue investigation time by **15%**.
- Provided technical guidance and troubleshooting support for customers using Linux and Windows operating systems in conjunction with Qumulo's on-premises and cloud deployments.
- Analyzed and troubleshooted file system permission issues and access control configurations within cloud environments, ensuring secure data access for enterprise clients.
- Containerized diagnostic tools and utilities using **Docker** for consistent deployment across customer environments and internal testing infrastructure.

SKILLS

Cloud Platforms – AWS, Azure, Compute, Storage, Networking, Identity Management

Operating Systems – Linux, Windows

File Systems & Permissions – Active Directory, LDAP, File Permissions, Access Control

Troubleshooting & Support – Technical Support, Incident Management, Root Cause Analysis, SLA Management, Ticketing Systems

Programming & Scripting – Python, Shell Scripting

Containerization – Docker

Networking – Network Troubleshooting, General Network Technologies

PROJECTS

Cloud Storage Diagnostics Tool (HCL Technologies)

- Developed a Python-based diagnostic tool to analyze performance metrics and configuration settings for cloud-based storage solutions, targeting common bottlenecks.
- Integrated the tool with **AWS CloudWatch** and **Azure Monitor** APIs to ingest relevant performance data, enabling comprehensive analysis of cloud file system behavior.
- Designed the tool's output to provide actionable insights and recommendations for optimizing storage performance and resolving access control issues for enterprise customers.

Automated Linux Environment Health Check (HCL Technologies)

- Created a suite of shell scripts to perform automated health checks on Linux servers within production environments, covering system logs, resource utilization, and service status.
- Implemented checks for critical services and file system integrity, flagging potential issues before they impacted end-users and reducing manual investigation time by approximately **10%**.
- Configured the scripts to integrate with **Splunk** for centralized logging and alerting on detected system anomalies.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
