## PROFESSIONAL EXPERIENCE

### Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Python** backend services using **FastAPI**, handling approximately **4,000 requests per minute** for core financial operations.
- Engineered **React 18** frontend components and user interfaces for enterprise-level applications, focusing on state management and component reusability.
- Designed and implemented RESTful APIs with **FastAPI** to facilitate seamless integration between frontend applications and backend data sources.
- Wrote comprehensive **unit tests** and integration tests for both backend and frontend code, achieving over **85% code coverage** for new features.
- Managed cloud infrastructure on **AWS** using **CloudFormation**, deploying and scaling services within **ECS** containers to support peak transaction loads.
- Collaborated on system releases within a **Git** repository, participating in code reviews and adhering to DevOps best practices for continuous integration.
- Integrated **code generation tools**, such as GitHub Copilot, to accelerate development cycles and improve code quality for routine tasks.

## SKILLS

**Backend Development** – Python, FastAPI, Flask, Django, REST APIs, System Integrations

**Frontend Development** – React 18, Typescript, Component Libraries, State Management, UI Applications

**Cloud & DevOps** – AWS, ECS, CloudFormation, Git, Terraform, CI/CD

**Databases** – PostgreSQL

**Tools** – GitHub Copilot, Amazon Q, Jira, Confluence, Docker

## PROJECTS

### Python-Based Payments Processing API

- Developed a **Python** microservice using **FastAPI** to manage inbound payment transaction data, processing an average of **5,000 transactions daily**.
- Implemented robust API endpoints for data ingestion and status querying, ensuring **p95 latency below 150ms** for all requests.
- Integrated with a **PostgreSQL** database to store and retrieve transaction details, including schema design and query optimization.

### React Customer Transaction Dashboard

- Built a dynamic **React 18** dashboard to visualize real-time transaction data for internal business users, displaying key operational metrics.
- Developed reusable UI components and integrated with backend APIs to fetch and display data from multiple sources.
- Managed application state effectively using React's context API and implemented data fetching strategies to ensure responsive user experience.

## EDUCATION

### M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

### B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

## CERTIFICATIONS

---

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
