PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** microservices, implementing RESTful APIs for internal systems and processing approximately **1,500 requests per minute**.
- Designed and implemented data pipelines using **Python** and **Pandas** to ingest, transform, and load data from various sources into a data warehouse, supporting ad-hoc reporting needs.
- Managed production environments for enterprise applications on **AWS**, including EC2, S3, and Lambda, focusing on operational stability and incident response using **Splunk** and **Dynatrace**.
- Collaborated with cross-functional teams to gather requirements and translate them into technical specifications for new feature development within enterprise business systems.
- Performed data validation and ad-hoc querying across **PostgreSQL** and **MySQL** databases, assisting in schema evolution and data integrity checks for critical business processes.
- Containerized Java applications using **Docker** and managed deployments via **Jenkins** CI/CD pipelines, ensuring consistent build and release cycles.
- Participated in Agile ceremonies including sprint planning and daily stand-ups, contributing to estimation and task breakdown for development sprints.

SKILLS

Languages – Java, Python, SQL, R, Bash

Frameworks & Libraries – Spring Boot, Spring, Hibernate, JPA, Pandas, NumPy, scikit-learn, Flask, FastAPI

Databases – PostgreSQL, MySQL, Oracle

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux

Data Visualization & BI – Power BI, Tableau, DAX, Power Query

Tools & Methodologies – Jira, Confluence, Agile, Scrum, REST APIs, Data Warehousing, ETL

PROJECTS

Enterprise Data Pipeline Orchestration (HCL Technologies)

- Engineered a **Python**-based ETL pipeline to consolidate data from multiple enterprise systems, including an ERP module and a legacy database, into a centralized data lake on **AWS S3**.
- Implemented data transformation logic using **Pandas** to clean and structure raw data, reducing data inconsistencies by an estimated **22%** for downstream analytical reporting.
- Developed automated data validation checks and scheduled jobs using **Cron** and shell scripting to ensure data integrity and timely delivery of processed datasets.

Financial Operations Dashboard Enhancement (HCL Technologies)

- Contributed to the development of a **Java Spring Boot** backend service that processed and enriched transaction data for a payments operations dashboard, handling approximately **500 events per second**.
- Wrote complex **SQL** queries against a **PostgreSQL** database to retrieve and aggregate transaction status information, supporting real-time monitoring and reconciliation workflows.
- Integrated new alerting mechanisms into the dashboard's backend, enabling proactive notification for over **15 types** of payment processing anomalies.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
