PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs, handling approximately **4,000 requests per minute** for core enterprise services.
- Implemented efficient data extraction and transformation logic using **Python scripting** and **pandas** to populate internal reporting databases, processing over **50GB of data daily**.
- Managed production support for critical enterprise applications on **AWS**, resolving P1/P2 incidents and ensuring adherence to service level agreements.
- Designed and executed database schema changes and optimizations in **PostgreSQL**, improving query performance for key financial reporting modules by an average of **18%**.
- Collaborated with cross-functional teams to integrate enterprise business systems via **REST APIs** and direct database integrations, ensuring data consistency across platforms.
- Containerized backend services using **Docker** and managed deployments via **Jenkins** CI/CD pipelines, reducing deployment time by approximately **30%**.
- Authored comprehensive production runbooks and internal documentation for new feature releases, improving onboarding time for the support team by an estimated **20%**.

SKILLS

Backend Development – Java, Spring Boot, Python, Flask, FastAPI, REST APIs, Microservices, OOP, Design Patterns

Data Engineering & Analytics – SQL, PostgreSQL, MySQL, Oracle, pandas, NumPy, ETL, Data Warehousing, Power BI, Tableau, DAX, Power Query

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux, Shell Scripting, Cron Jobs

Enterprise Systems – ERP Integration, Change Management, Incident Response, SLA Management, Jira, Confluence

Data Science & ML – scikit-learn, Statistical Analysis, Regression, Hypothesis Testing, Machine Learning Fundamentals

PROJECTS

Financial Operations Dashboard Enhancement (HCL Technologies)

- Enhanced a **payments operations dashboard** by building new **Java Spring Boot** microservices to process and monitor transaction flows in near real-time.
- Developed Python scripts to automate data validation and reconciliation checks, reducing manual review effort for **transaction monitoring** by approximately **40%**.
- Integrated new alerting mechanisms into the dashboard using **Splunk**, ensuring timely notification for over **50 types of operational failures**.

Enterprise System Integration Automation (HCL Technologies)

- Automated cross-system data synchronization between an **ERP system** and a proprietary operational platform using **Python** and direct **SQL** queries.
- Designed and implemented **REST APIs** for secure data exchange, improving data consistency and reducing integration errors by **~22%** across interconnected systems.
- Managed the change control process for system configuration updates, coordinating UAT and providing post-go-live support for critical business functions.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
