PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** applications, implementing RESTful APIs for cross-service data exchange and ensuring robust error handling.
- Designed and executed SQL queries across **PostgreSQL** and **MySQL** databases for data validation, ad-hoc reporting, and schema evolution, supporting critical business logic.
- Automated operational tasks and data processing workflows using **Python** scripting, including ETL processes and scheduled report generation for business stakeholders.
- Collaborated with cross-functional teams to translate business requirements into functional specifications for BI development, contributing to the automation of basic processes.
- Produced insight reports using inferential statistics and translated them into **Power BI** dashboards providing executive-level information to senior stakeholders.
- Analyzed historical data and current call and chat volumes to forecast staffing requirements and monitor schedule adherence for workforce planning.
- Containerized applications using **Docker** and managed deployments on **AWS EC2** instances, ensuring efficient resource utilization and application portability.

SKILLS

Languages – Java, Python, SQL, R, DAX

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn, Flask, FastAPI

Databases – PostgreSQL, MySQL, Oracle

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

BI & Analytics Tools – Power BI, Tableau, RStudio

Methodologies – Agile, Scrum

Other Tools – Jira, Confluence, Splunk, Dynatrace

PROJECTS

Customer Contact Reduction Initiative

- Developed Python scripts to analyze customer interaction data from various channels, identifying patterns leading to repeat contacts.
- Designed and implemented automated responses for common query types within the customer support platform, reducing manual agent intervention by an estimated 15% during pilot testing.
- Collaborated with operations partners to map existing contact workflows, highlighting manual steps suitable for automation or deflection strategies.

Workforce Planning Analytics Dashboard

- Created a **Power BI** dashboard integrating historical call/chat volume data with staffing levels to visualize forecast accuracy and schedule adherence.
- Developed **DAX** measures to calculate key performance indicators such as average handling time, queue wait times, and agent occupancy rates.
- Built data models in Power BI to support the analysis of customer behaviour and inform future headcount planning and forecasting efforts.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
