PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and deployed **AI agents** that execute real-time actions for enterprise customers, translating business challenges into actionable solutions using **LLM technologies**.
- Designed agent intelligence, including **prompt engineering**, reasoning logic, and tool orchestration, for the **Agentforce platform** to support customer-facing AI solutions.
- Collaborated with builder pods to architect, build, and debug scalable production systems using **JavaScript**, **Python**, and **Apex**, ensuring high-quality code delivery.
- Partnered with clients to gather requirements and define agentic solutions, demonstrating consultative skills to ensure technical solutions met real-world business needs.
- Integrated **Cursor** and **Claude** AI tools into development workflows to accelerate the creation and deployment of AI-powered customer solutions.
- Containerized and deployed AI agent services using **Docker** and orchestrated on **Kubernetes (EKS)**, managing configurations and resource allocation for predictable rollouts.
- Contributed to technical sprint planning and estimation sessions, providing input on development timelines and resource allocation for new AI features.

SKILLS

AI/ML – AI Agents, LLM, Prompt Engineering, Generative AI, Agentic Solutions, AI Builder, Agentforce Platform, Claude, Cursor

Programming Languages – Python, JavaScript, Apex, TypeScript, OOP

Backend/API – REST APIs, GraphQL, Real-Time Infra, FastAPI, Flask

Cloud/DevOps – AWS, Docker, Kubernetes, EKS, CI/CD, Jenkins

Databases – PostgreSQL, MySQL, Oracle, Relational Databases

Methodologies – Agile, Scrum, Change Management

Other – Jira, Confluence, Linux Shell Scripting

PROJECTS

Customer AI Agent Onboarding Accelerator

- Developed a Python-based onboarding framework for enterprise customers to rapidly deploy custom AI agents, reducing initial setup time by **40%**.
- Built reusable agentic components and prompt templates for common business workflows, enabling clients to integrate AI capabilities with minimal custom code.
- Conducted technical walkthroughs and provided post-deployment support to customer engineering teams, ensuring successful integration into their existing systems.

Real-Time Transaction Analysis Engine

- Engineered a Python-based real-time data pipeline to process and analyze high-volume transaction data, handling approximately **3,500 events per second** during peak hours.
- Developed a **FastAPI** service to expose analyzed data via a **GraphQL** API for consumption by downstream AI models and reporting dashboards.
- Implemented robust error handling and logging mechanisms using **Splunk** for monitoring system health and identifying potential data anomalies.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
