PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and built **AI agents** that take real actions for enterprise customers, focusing on prompt engineering and reasoning logic within the **Agentforce platform**.
- Collaborated with cross-functional builder pods to architect, debug, and deploy **scalable production systems** using **JavaScript** and **Python**, ensuring high-quality code delivery.
- Partnered with clients to translate complex business challenges into **agentic solutions**, demonstrating consultative skills to ensure technical implementation met real-world needs.
- Developed **AI-powered development** solutions using tools like **Cursor** and **Claude**, accelerating the design and deployment of agentic features for Fortune 500 companies.
- Integrated **real-time infrastructure** components into agentic solutions, handling high-volume data streams and ensuring responsive performance for customer-facing applications.
- Owned the entire technical lifecycle from ideation through testing and deployment, iterating rapidly to ship impactful agentic solutions for production environments.
- Containerized **AI agent services** using **Docker** and deployed them onto a Kubernetes cluster, configuring resource limits and monitoring for predictable rollouts.

SKILLS

AI/ML – AI Builder, Agentic Solutions, Prompt Engineering, LLM, Generative AI, AI Agents, Claude, Cursor

Programming Languages – Python, JavaScript, TypeScript, OOP

Web Technologies – React, GraphQL

Cloud & DevOps – AWS, Docker, Kubernetes, CI/CD

Databases – PostgreSQL, Real-Time Infra

Methodologies – Agile, Scrum

PROJECTS

Customer AI Agent Development Platform

- Designed and developed an **AI agent framework** for enterprise clients, enabling them to build and deploy custom agents for automated workflows.
- Implemented a **RAG architecture** to allow agents to access and process customer-specific knowledge bases, improving response accuracy by approximately 30%.
- Integrated **Python-based agent logic** with a RESTful API layer, facilitating seamless interaction with existing customer systems and applications.

Real-Time Actionable Insights Engine

- Built a **real-time data processing pipeline** using Python and AWS Lambda to ingest and analyze high-velocity event streams for actionable insights.
- Developed **predictive models** using scikit-learn on customer interaction data, achieving an AUC of 0.82 for identifying high-potential leads.
- Containerized the inference service with **Docker** and deployed it on AWS ECS, ensuring scalable and low-latency model serving for customer-facing features.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
