PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Administered and maintained production server infrastructure across **Linux** and **Windows Server** environments, ensuring high availability for core business operations.
- Implemented and managed user, group, and permission access controls following least-privilege principles for both **Linux** and **Windows** systems.
- Automated routine administrative tasks using **Bash** and **Python** scripting, reducing manual effort for common deployment and configuration processes.
- Monitored system health and availability using **Splunk** and **Dynatrace**, investigating alerts and diagnosing root causes to maintain service stability.
- Performed regular system patching and security updates across server fleets, adhering to security best practices for vulnerability management and hardening.
- Collaborated with internal development and service owner teams to troubleshoot system, application, and network incidents, documenting root causes and resolutions.
- Supported backup and recovery strategies, including regular restore testing, to ensure data integrity and disaster recovery readiness for critical services.

SKILLS

Operating Systems – Linux, Windows Server

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Scripting & Automation – Python, Bash, PowerShell

Networking – TCP/IP, DNS, DHCP, VPNs, Firewalls

Monitoring & Observability – Splunk, Dynatrace

Identity & Access Management – Active Directory, User Permissions

Infrastructure – Docker, Jenkins, Git

PROJECTS

Enterprise Linux Server Hardening and Automation

- Configured and maintained a fleet of **Linux** servers on **AWS EC2**, implementing security hardening measures and OS-level configurations.
- Developed **Bash** scripts to automate user onboarding and system configuration tasks, reducing manual setup time by approximately 40%.
- Integrated system monitoring with **Splunk** for log aggregation and alerting, ensuring proactive identification of potential issues across the server environment.

Automated Windows Server Deployment and Management

- Managed **Windows Server** environments, including configuration of **DNS** and **DHCP** services, and user account management via **Active Directory**.
- Created **PowerShell** scripts to automate the deployment and initial configuration of new server instances, streamlining the provisioning process.
- Collaborated with internal teams to establish patching schedules and procedures, ensuring timely application of security updates and maintaining system integrity.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
