PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Diagnosed and resolved technical issues for photovoltaic solutions, including inverters and battery systems, for specialist personnel and PV installers, reducing average ticket resolution time by **18%**.
- Provided expert technical support for the Huawei photovoltaic product portfolio, meticulously documenting and tracking over **450** support requests within the Jira ticketing system.
- Assisted with the initial analysis and troubleshooting of faults in PV systems via phone and email, developing clear, actionable solutions for end-customers and partners.
- Supported technical aspects of customer events and trade fairs, serving as a primary point of contact for product inquiries and system solution questions.
- Collaborated with cross-functional teams to gather requirements for new product features and system enhancements, ensuring alignment between technical capabilities and customer needs.
- Developed Python scripts to automate data extraction and reporting from system logs, streamlining the generation of weekly performance summaries for the support team.
- Managed production environments with strict SLAs, performing incident response and root cause analysis for P1/P2 incidents impacting enterprise applications.

SKILLS

Technical Support – Photovoltaic systems, PV installers, Huawei photovoltaic products, Inverters, Battery solutions, Commissioning, Troubleshooting, Ticketing system, Technical documentation

Programming Languages – Python, Java, SQL, Shell Scripting

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux

Databases – PostgreSQL, MySQL, Oracle

Tools & Methodologies – Jira, Confluence, Git, Jenkins, Agile/Scrum, Splunk, Dynatrace

Data Analysis & Visualization – Power BI, Tableau, R/RStudio, pandas, NumPy, scikit-learn, DAX, Power Query

PROJECTS

PV System Monitoring and Alerting Dashboard (HCL Technologies)

- Developed a Python-based application to ingest and process real-time data from PV system monitoring APIs, enabling proactive fault detection.
- Built automated alerting mechanisms that notified support engineers of critical system anomalies, reducing response times for major incidents by approximately **30%**.
- Designed and implemented a PostgreSQL database schema to store historical performance data, facilitating trend analysis and long-term system health assessment.

Customer Onboarding Automation for Technical Solutions (HCL Technologies)

- Created a Python scripting suite to automate repetitive tasks during the technical onboarding of new enterprise clients for an internal platform.
- Developed interactive documentation and guided walkthroughs for customer integration engineers, significantly improving the speed of initial system setup for **5+** pilot customers.
- Integrated API endpoints to facilitate data exchange between the client's systems and the internal platform, ensuring seamless data flow during the initial integration phase.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
