PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Administered and troubleshooted enterprise **Linux systems** (RHEL, CentOS, Ubuntu) in a production environment, ensuring optimal performance and stability for critical financial operations.
- Developed and maintained **Ansible workflows** for automated configuration management and system provisioning, reducing manual deployment time by approximately 40% across managed servers.
- Managed identity and access controls across core infrastructure platforms, implementing granular permissions and regularly auditing user access for enhanced security.
- Proactively monitored system health using **Splunk and Dynatrace**, analyzing trends and identifying potential issues to improve early detection and reduce alert noise by 20%.
- Executed root cause analysis for P1/P2 incidents, contributing to long-term resolution strategies and enhancing platform stability for interconnected enterprise systems.
- Produced and maintained detailed **runbooks and operational procedures** in a centralized knowledge base, standardizing support processes for the Level 2 System Support team.
- Managed incidents and requests through **ServiceNow**, ensuring timely resolution and accurate updates, while participating in on-call rotations for after-hours support.

SKILLS

Operating Systems – Linux (RHEL, CentOS, Ubuntu), Shell Scripting

Automation & Configuration Management – Ansible, Jenkins, Git

Virtualization & Cloud – VMware vSphere, AWS (EC2, S3, Lambda, CloudWatch)

Monitoring & Observability – Splunk, Dynatrace, CloudWatch

System Administration – User Management, Patching, Performance Tuning, Log Analysis

Networking – DNS, DHCP, TCP/IP

Ticketing & ITSM – ServiceNow

PROJECTS

Linux Infrastructure Automation with Ansible

- Automated the deployment and configuration of **RHEL and CentOS servers** using Ansible playbooks, ensuring consistent environments for enterprise applications.
- Developed modular Ansible roles for common tasks like user management, package installation, and service configuration, improving reusability and reducing script redundancy.
- Integrated Ansible workflows into the existing **CI/CD pipeline** with Jenkins, enabling automated testing and deployment of infrastructure changes.

Production Systems Monitoring and Alerting Enhancement

- Configured and fine-tuned **Splunk dashboards** to visualize key performance indicators and system health metrics for Java Spring Boot applications.
- Implemented custom alerting rules in Dynatrace to proactively identify and notify on anomalies in transaction processing flows, reducing manual oversight by approximately 30%.
- Documented common failure scenarios and their corresponding diagnostic steps, creating actionable insights for the operations team to resolve issues faster.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
