PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Python** data pipelines for ETL processes and automated reporting on AWS, processing approximately **10,000 records daily**.
- Designed and implemented **Java Spring Boot** REST APIs for cross-service data integration, enhancing system interoperability and reducing data latency by **15%**.
- Managed production support for enterprise applications on **AWS**, utilizing **Splunk** and **Dynatrace** for monitoring and incident response, ensuring adherence to strict SLAs.
- Built and operated data ingestion and serving workflows on **AWS**, incorporating **event-driven patterns** to support analytics and AI initiatives for enterprise customers.
- Contributed to platform reliability by implementing **CI/CD improvements** using **Jenkins** and Git, and participating in code reviews to uphold development standards.
- Supported internal analytics and product engineering teams by troubleshooting data pipelines and resolving data quality issues, enabling new use cases and improving developer experience.
- Managed infrastructure changes and access control for shared data platform components, following established architecture and standards to ensure secure and efficient operations.

SKILLS

Cloud & Data Platforms – AWS (EC2, S3, Lambda, CloudWatch), Airflow, Kafka

Languages & Frameworks – Python, Java, Spring Boot, SQL, Bash

Data Engineering & Databases – PostgreSQL, MySQL, Oracle, Data Warehousing, ETL, dbt

DevOps & Infrastructure – Docker, Kubernetes, Terraform, Jenkins, Git, CI/CD

Observability & Monitoring – Splunk, Dynatrace, CloudWatch

Analytics & BI – Power BI, Tableau, R, pandas, NumPy, scikit-learn, DAX, Power Query

Methodologies – Agile, Scrum

PROJECTS

AWS Data Pipeline for Financial Transactions

- Engineered a scalable **Python** data pipeline on **AWS Lambda** and **S3** to ingest and transform financial transaction data, handling approximately **3,500 events per second** during peak hours.
- Implemented robust data validation and error handling mechanisms, reducing data quality issues downstream by **40%** and ensuring adherence to data contracts with consuming services.
- Integrated the pipeline with **PostgreSQL** for storing processed data and utilized **Airflow** for scheduling and monitoring job execution, ensuring reliable data delivery for operational reporting.

Automated Reporting and Observability Platform

- Developed automated data extraction and reporting scripts using **Python** and **SQL** against enterprise databases, delivering daily operational summaries to business stakeholders.
- Configured **Splunk** dashboards to monitor pipeline health and performance, providing real-time visibility into data processing status and alerting on anomalies.
- Containerized reporting services using **Docker** and deployed them to an **AWS EC2** instance, streamlining deployment and ensuring consistent execution environments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
