## PROFESSIONAL EXPERIENCE

### Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Managed the **production support** and **incident response** for enterprise applications, consistently meeting SLA targets through proactive monitoring with **Splunk** and **Dynatrace**.
- Developed **Python scripts** to automate ETL processes and generate scheduled operational reports, improving data processing efficiency for the financial services team.
- Executed **SQL queries** for data validation and performed schema modifications across **PostgreSQL** and **Oracle** databases to support system integrations.
- Contributed to feature development and bug fixes for **Java Spring Boot** REST APIs, enhancing existing service functionality.
- Containerized applications using **Docker** and managed deployments on **AWS EC2** instances, ensuring consistent environments for development and production.
- Participated in **Agile/Scrum ceremonies**, including sprint planning and retrospectives, and managed tasks and defects using **Jira**.
- Supported critical change management processes for enterprise systems, coordinating User Acceptance Testing (UAT) and providing post-go-live assistance.

## PROJECTS

### Financial Operations Dashboard Enhancement

- Developed new Java Spring Boot modules to enhance transaction monitoring capabilities on a payments operations dashboard for a financial services client.
- Authored Python scripts to automate the parsing and aggregation of failed payment message data, reducing manual processing time by approximately 40%.
- Implemented robust error handling and alerting mechanisms using **Splunk**, ensuring timely notification for critical operational issues.

### ERP System Integration Automation

- Designed and implemented REST APIs using Java Spring Boot to facilitate data exchange between an ERP system and a client's operational platform.
- Wrote **SQL scripts** to migrate and validate data across PostgreSQL and Oracle databases during system integration phases, ensuring data integrity for over 15,000 records per batch.
- Collaborated with business analysts to gather requirements for cross-system integrations, ensuring alignment with operational workflows.
