PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Monitored and triaged real-time security events from multiple sources including **SIEM**, **EDR**, and **Firewalls** to detect potential cyber threats across a large enterprise network.
- Analyzed security alerts by correlating data from diverse security tools, identifying indicators of compromise and assessing the scope of potential incidents.
- Responded to and contained identified security incidents, developing and executing eradication strategies in coordination with lead analysts and incident response teams.
- Developed and implemented process improvements for security monitoring tools, enhancing detection capabilities and reducing alert fatigue by approximately **15%**.
- Collaborated with cross-functional teams within the Cyber Fusion Center to share threat intelligence and maintain a unified defense posture.
- Participated in regular knowledge-sharing sessions, contributing to the development of a strong Fusion Center mindset and a follow-the-sun operational model.
- Managed incident status communications to lead analysts and management, ensuring timely and accurate updates on ongoing security events.

SKILLS

Security Operations – SIEM, EDR, Firewall analysis, Incident Triage, Threat Detection, Malware Analysis, Phishing Techniques

Networking – TCP/IP, Network Protocols

Operating Systems – Linux, Windows, MacOS

Scripting & Automation – Python, Shell Scripting

Cloud Monitoring – AWS, CloudWatch

IT Service Management – Jira, Confluence, Incident Management

PROJECTS

Enterprise Security Event Monitoring and Triage

- Developed Python scripts to automate the ingestion and initial analysis of security logs from various sources, reducing manual triage time by **20%**.
- Configured and maintained monitoring dashboards in **Splunk** and **Dynatrace** to provide real-time visibility into system health and security event activity.
- Participated in an on-call rotation for production support, responding to P1/P2 incidents related to application security and system availability.

Linux System Hardening and Security Auditing

- Performed security audits and applied hardening configurations to a fleet of **Linux** servers in a production environment, reducing identified vulnerabilities by **30%**.
- Wrote shell scripts to automate security checks and configuration deployments across multiple Linux instances, improving consistency and reducing deployment errors.
- Documented security best practices and standard operating procedures for Linux system administration, contributing to team knowledge sharing.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
