PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Executed authorized adversary-emulation activities across **enterprise applications** and **critical infrastructure**, assessing security controls and organizational resilience.
- Performed targeted security assessments on **cloud platforms**, **network infrastructure**, and **enterprise technologies**, evaluating detection and response capabilities.
- Collaborated with cybersecurity, technology, and risk stakeholders to develop realistic, **threat-informed testing scenarios** based on adversary behaviors.
- Developed and adapted **security tools and techniques** to support realistic testing, ensuring secure and compliant usage within approved environments.
- Produced clear, audit-ready reporting detailing identified risks and supported remediation efforts to strengthen defenses, reducing critical vulnerabilities by **~18%**.
- Evaluated detection and response capabilities through coordinated **purple-team activities**, identifying gaps in security monitoring and incident response processes.
- Containerized assessment tools using **Docker** and deployed them to **AWS EC2 instances**, enabling rapid and consistent execution of security tests.

SKILLS

Offensive Security – Adversary Emulation, Penetration Testing, Infrastructure Security, Cloud Security, Application Security, Threat Intelligence, Attack Frameworks (MITRE ATT&CK;)

Scripting & Automation – Python, Shell Scripting, Bash

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Operating Systems – Linux, Windows

Networking – Network Security, TCP/IP, DNS

Tools & Utilities – Docker, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace

Security Controls – Identity and Access Management, Data Protection, Secure Software Development, Endpoint Security, Vulnerability Management

PROJECTS

Enterprise Infrastructure Security Assessment (HCL Technologies)

- Conducted comprehensive security assessments on a **large-scale enterprise network**, identifying vulnerabilities in network segmentation and firewall rules.
- Developed **Python scripts** to automate the discovery and vulnerability scanning of over **500 internal servers**, reducing manual effort by 40%.
- Documented findings and provided actionable recommendations for hardening infrastructure and improving **security monitoring**, contributing to a 15% reduction in critical alerts.

Cloud Application Security Testing (MSc Project)

- Performed security testing on a simulated **AWS-based application**, focusing on common vulnerabilities like insecure API endpoints and misconfigured S3 buckets.
- Utilized **Docker containers** to deploy testing tools and simulate various attack vectors against the cloud environment.
- Analyzed application logs using **Splunk** to identify indicators of compromise and assess the effectiveness of security controls.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
