PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained Java Spring Boot REST APIs, implementing robust error handling and request validation for internal services.
- Engineered Python scripts to automate ETL processes, transforming and loading data from disparate sources into a central data warehouse, processing approximately 1.5 TB of data weekly.
- Managed production support for enterprise financial-services applications, responding to P1/P2 incidents and adhering to strict SLAs using Splunk and Dynatrace for real-time monitoring.
- Designed and implemented a distributed Python-based data processing pipeline on AWS Lambda and S3 for batch analytics, handling around 3,500 events per second during peak hours.
- Collaborated with operations teams to gather requirements for enhancing transaction monitoring features on a payments operations dashboard, improving alert accuracy by 18%.
- Wrote and maintained SQL queries across PostgreSQL and Oracle databases for data validation, ad-hoc reporting, and schema evolution to support new business logic.
- Containerized Java Spring Boot applications using Docker and deployed them to an AWS EKS cluster, configuring basic resource limits and monitoring within Jenkins CI/CD pipelines.

SKILLS

Languages – Python, Java, SQL, R

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn, Hibernate, JPA, FastAPI, Flask

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes (EKS), Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Splunk, Dynatrace, Jira, Confluence, Power BI, Tableau, RStudio

Domain Knowledge – Payments Operations, Transaction Monitoring, Reconciliation Workflows, ERP Integration Support, GDPR Compliance

PROJECTS

Automated Transaction Reconciliation System (HCL Technologies)

- Developed a Python application to automate the reconciliation of high-volume financial transaction data, reducing manual reconciliation effort by approximately 40% for the operations team.
- Designed and implemented data extraction routines using SQL against PostgreSQL and Oracle databases, followed by data transformation and validation using pandas.
- Integrated the system with existing operational alerting mechanisms, flagging discrepancies and generating summary reports for business analysts and compliance officers.

Enterprise Application Performance Monitoring Dashboard

- Built an interactive Power BI dashboard to visualize key performance indicators and operational metrics for enterprise Java applications, consolidating data from Splunk and Dynatrace.
- Developed custom DAX measures and Power Query transformations to aggregate and analyze application logs, identifying patterns that led to a 15% reduction in recurring P1 incidents.
- Collaborated with production support engineers to define critical metrics and alert thresholds, ensuring timely identification of system degradation.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
