PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs for internal services, handling approximately **1,500 requests per minute** during peak hours.
- Implemented complex data retrieval and manipulation logic using **Hibernate** and **JPA**, optimizing database interactions to reduce query times by an average of **18%**.
- Designed and coded object-oriented solutions in **Java**, incorporating **JUnit** tests and adhering to SOLID principles to enhance code maintainability and reduce defects by **15%**.
- Collaborated on the design and implementation of **scalable architectures**, contributing to technical estimations and participating in sprint planning ceremonies within an Agile framework.
- Gained exposure to **NoSQL database concepts** through integration work with a document-based data store for unstructured data processing.
- Participated in **code reviews** for peer-developed features, ensuring adherence to coding standards and contributing to a more stable codebase.
- Containerized applications using **Docker** and managed deployments on **AWS EC2 instances**, ensuring consistent environments across development and production.

SKILLS

Languages – Java, Python, SQL, C#, C++

Frameworks/Libraries – Spring Boot, Hibernate, JPA, JUnit, Pandas, NumPy, Scikit-learn

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle, NoSQL

Tools/Methodologies – Agile, Scrum, Jira, Confluence, Linux Shell Scripting

Analytics/BI – Power BI, Tableau, DAX, Power Query, R/RStudio

PROJECTS

Enterprise Java Application Modernization

- Refactored a legacy Java application module into a modern **Spring Boot** microservice, improving performance by **22%**.
- Integrated the new service with existing enterprise systems using **REST APIs** and implemented robust error handling with **Hibernate** for data persistence.
- Containerized the microservice using **Docker** and deployed it to an **AWS EC2** environment, establishing a basic CI/CD pipeline with **Jenkins**.

Python-based Data Processing Pipeline

- Developed a **Python** script to automate the extraction, transformation, and loading (ETL) of data from multiple relational databases (**PostgreSQL**, **MySQL**) into a central data warehouse.
- Implemented data validation checks and anomaly detection using **Pandas** and **NumPy**, reducing data quality issues by approximately **15%**.
- Scheduled and monitored the data pipeline execution using **Linux cron jobs** and basic logging to ensure timely data availability for reporting.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
